

In traditional alarm applications, a siren driver broadcasts a warning sound to ward off intruders or alert the property owner to an intrusion or fire. Adding voice to the siren driver allows you to broadcast a clear, concise message that eliminates the guesswork for small children, the elderly, and the rest of us to clarify the sound. Step up to a recordable driver and expand your market to those needing messages for: sales promotions, greetings, alerts, industrial broadcast, gate access, museum exhibit information, amusement park sounds, and more.

What makes ELK drivers different?

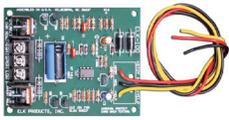

Each ELK driver provides compatibility with virtually any control panel while offering volume and current draw options. The ELK-120 and ELK-124 feature both a traditional speaker output and a RCA line level output for interfacing with amplified systems such as paging, intercoms, or nurse call.

Siren, Voice, & Recordable Drivers

ELK-100

High Performance Siren Driver

Great for residential or commercial alarm installations, the ELK-100 draws less current than many siren drivers. It offers 2 volume levels simultaneously, allowing exterior sound to be louder than interior.

ELK-101

Two Channel Siren Driver

The ELK-101 is a two channel (Yelp and Steady) siren driver. It is capable of delivering high output volume while consuming very low current draw. It can be powered from 6 or 12 VDC and is compatible with a wide variety of alarm panels.

ELK-110

CO, Burg & Fire Voice Siren Driver with Temporal Codes

Now Featuring Carbon Monoxide Input Channel! The ELK-110 is ideal for residential and commercial alarm applications. It combines the advantages of high quality voice messages with conventional siren and temporal code tone sounds. It features 3 input channels, bilingual voice messages, and many unique options.

ELK-120

Recordable Voice and Siren Driver with Temporal Code

This unique driver can be utilized as 4 voice recordable channels or 2 siren channels and 2 voice channels. Recording is easy using on-board microphone or .wav file download from a PC using ELK-129.

ELK-124

Recordable Voice Annunciator

Applications are endless with this versatile unit. It allows up to 8 custom announcements which can be related to security, access control, museum narratives, amusement sounds/messages, on-hold messages for phone systems, equipment warnings, etc.

ELK-129

PC Sound Card Interface for Recordable Drivers

This interface allows you to download Audio .Wav files from your computer to ELK's recordable modules.
