About this application

The INTERCOM APP Type B (hereinafter referred to as this app) can be used as part of the master monitor station functions by installing it on an iPhone or an iPad (hereinafter referred to collectively as an iOS device) or an Android device.
This app can be used not only inside the house within range of the wireless LAN connected to the master monitor station, but also outside the house by using a 4G network or the like.
To use this app, you must register an iOS device or an Android device installed with this app to the master monitor station at the initial set-up. Up to eight devices can be registered to the master monitor station.

* iPad and App Store are trademarks of Apple Inc. in the United States and/or other countries.
* Android and Google Play are trademarks of Google Inc. in the United States and/or other countries.

Notices

Use this app only as a supplementary tool for the master monitor station.

- In this manual, iPhone and iPad are collectively referred to as iOS devices.
- In this manual, Android smartphones and tablets are collectively referred to as Android devices.
- Connect the master monitor station to a wireless LAN network. Please refer to the instruction manual for the master monitor station.
- The user is responsible all the Internet connection fees for using this app. Connection fees may differ greatly depending on your data plan and the place of usage, therefore confirm your contract details before using this app.
- Depending on your network, the app may not be able to communicate successfully.
  - minimum internet connection bandwidth for uploads: 0.2Mbps
  - minimum internet connection bandwidth for downloads: 1.3Mbps
- Depending on the device specifications, notifications may arrive late or may not arrive.
- This app may not be able to respond if it is affected by wireless LAN malfunctions, 3G/4G mobile network outages or device battery exhaustion.
- This app may conflict with voice calls of other applications.
- Depending on your device settings or network connection, it may take sometime for communication to start after you tap .
- Please note that images and illustrations depicted in this manual may differ from the actual product.
- The screen images depicted in this manual show the screens of an iOS device.
- You may not be able to use this app if your device is set to reduce battery consumption or you are using multiple applications.
- When establishing a link between this app and the master monitor station, be sure to set the date and time of the master monitor station to the current date and time.
  If the time does not match between this app and the master monitor station, this app may not function correctly.
- When using an iPad or an Android tablet, this app is displayed sideways.
- Depending on the device or the OS, a notification badge may be displayed on the icon of this app.

Registering iOS or Android device to the master monitor station

NOTES:

- Up to eight iOS or Android devices can be registered to the master monitor station. The registration must be performed for each device individually.
- Make sure to register an iOS device or an Android device when they are connected to the same wireless LAN with the master monitor station.

Registering an iOS device or an Android device to the master monitor station

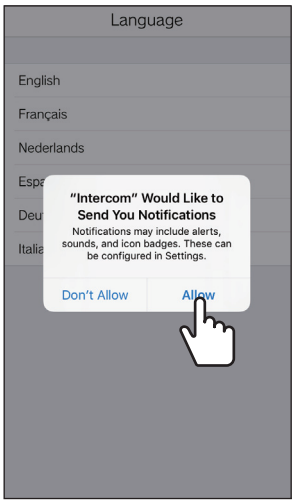
1 Download INTERCOM APP Type B.

Download "INTERCOM APP Type B" from the following:

- iOS device: App Store
- Android device: Google Play

2 Run this app by tapping the icon on your device Home screen.

3 Allow this app to send notifications.

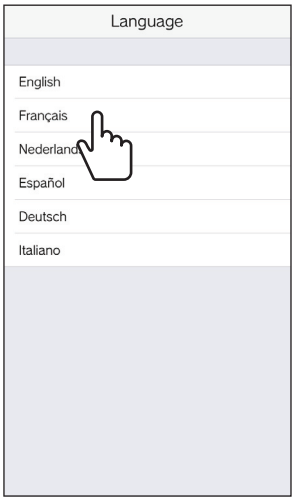


* If not allowed, this app cannot display notifications.

* If the dialog is not displayed, or if you want to change the notification method, use the application settings of your iOS device or your Android device to configure the settings as necessary.

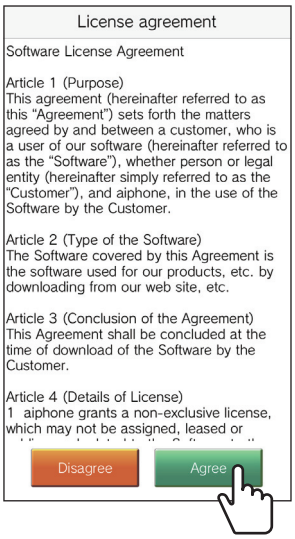
4 Set the display language.

Select the language by tapping the screen.



5 Tap OK.

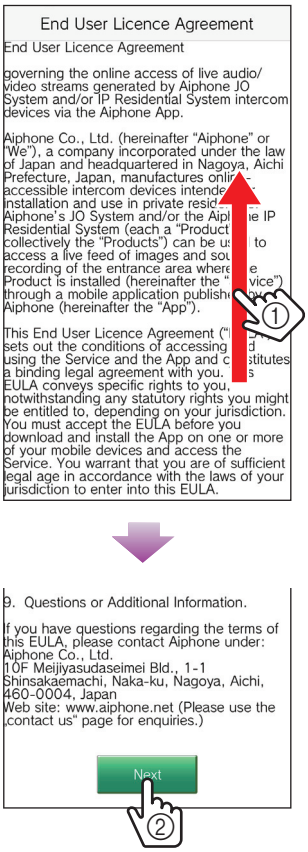
6 Read the License Agreement carefully and tap Agree.



* The license agreement is displayed when this app is started for the first time.

* If you do not agree to the contents of the License Agreement, you cannot use this app.

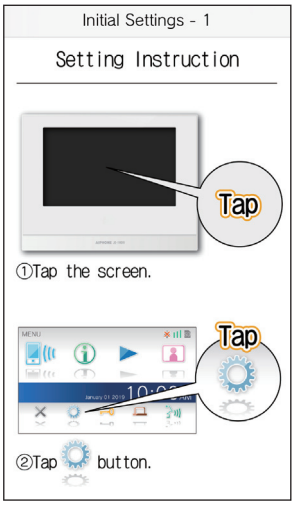
7 Read the screen for End User Licence Agreement (EULA) carefully and tap **Next**.



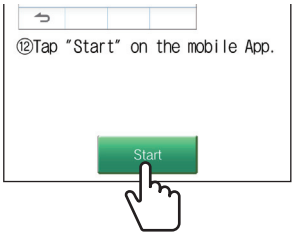
8 Operate the master monitor station to display the one-time password on the master monitor station screen.

Follow the on-screen instructions carefully. If necessary, refer to the master monitor station instruction manual.

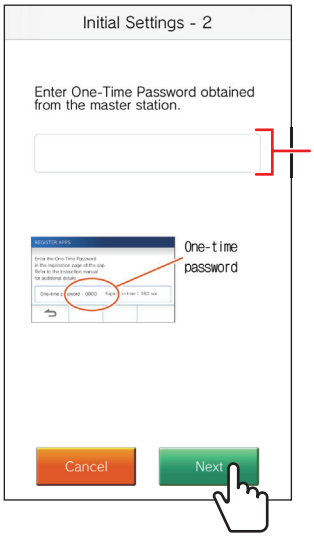
* Refer to the master monitor station instruction manual for operating the master monitor station.



9 Tap **Start**.



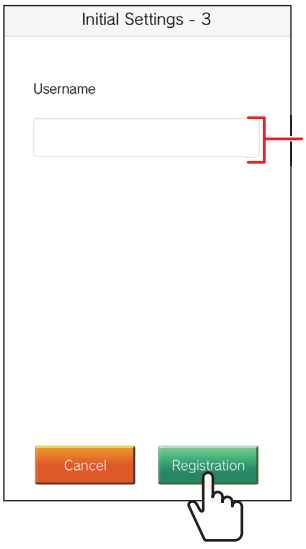
10 Enter the one-time password displayed on the master monitor station screen within the expiration time, and then tap **Next**.



11 Enter user name of the mobile device and then tap **Registration**.

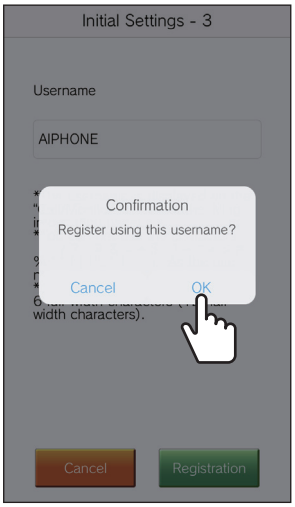
* Up to 12 characters can be entered.

* The following characters cannot be used for the user name.



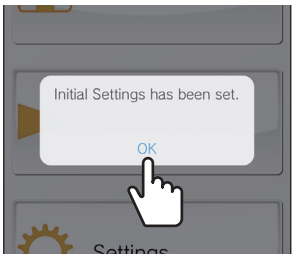
* The entered name is registered to the master monitor station.

12 Tap **OK**.

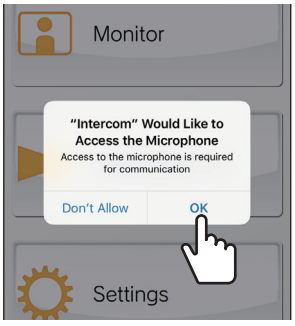


When "Initial setting has completed." is displayed, the registration has completed.

13 Tap **OK**.



14 Tap **OK** to allow this app to access the microphone.

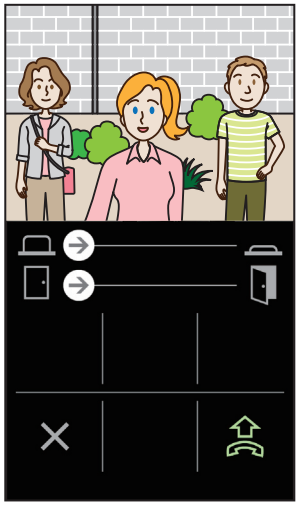


* If you do not allow this app to access the microphone, you cannot communicate with the door station.
* Please check the operation after the registration has completed.

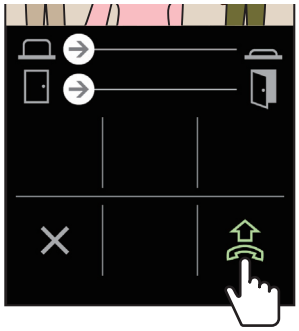
Checking the operation

1 Press the call button of the door station.

2 Confirm that the incoming call screen is displayed on your device.



3 Tap to communicate with the door station.



If you can communicate, the set-up has been successful.

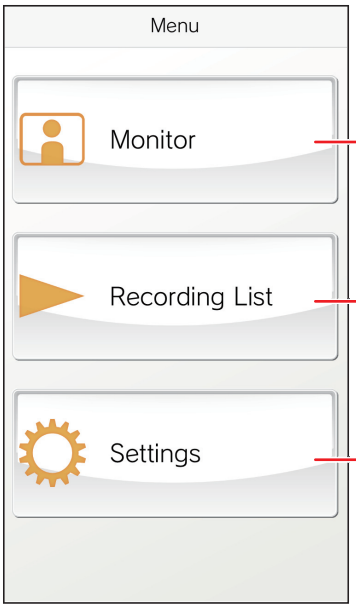
* The application ringtone can be changed. (→ P. 13)

When registering additional iOS device or Android device, repeat steps **1** to **14** of "**Registering an iOS device or an Android device to the master monitor station**" and steps **1** to **3** of "**Checking the operation**" in the same manner.

* Up to 8 devices can be registered to the master monitor station.

Buttons and icons

■ MENU screen



Monitor (→P. 11)
Tap this to monitor the door station.

Recording List (→P. 12)
Tap this to watch recordings stored in the master monitor station.
