

DVR SECURITY LOCK BOX

The Kendall Howard DVR Security Lock Box safely secures devices such as digital video recorders, sensitive network appliances, DVR systems, and even tower computers. Designed to be a desktop or wall mount solution, this secure lock box allows you to prevent unauthorized use of your equipment in a variety of environments.

- Heavy duty security enclosure
- 270 degree swing open door
- Made in the USA
- Limited Lifetime Warranty

FEATURES

Ventilation Options - Built-in fan grates allow up to one or two optional fans to be installed in the DVR Security Lock Box. (One fan for the 15" deep box and two fans for the 21" deep box.)

Inset Locking Door - The locking front door swings open 270 degrees for easy access to equipment. The inset hinge and recessed door prevents tampering and reinforces the strength and security of this DVR enclosure.

Heavy Duty Construction - Manufactured from heavy gauge steel, this DVR Security Lock Box is one of the strongest and most secure solutions available.

Cable Routing Holes - Top and back cable routing holes allow numerous cables to be fed into the security cabinet to connect or power enclosed devices.

Mounting Options - While the lock box can be set on any surface, it can also be mounted on the wall to free up workspace. If heavy equipment will be installed, we recommend reinforcing the lock box with the optional Wall Mount Bracket Kit (SKU: 1917-3-002-00).
