### GENERAL DESCRIPTION

The GEMC-FPRINT Parallel Printer Interface is a Fire bus-connected device that allows the Gemini C-Series control panels to be connected to a parallel printer for the purpose of recording system activity. When installed on a Gemini C-Series control panel that has been programmed via PCD-Windows v.6.0 (or greater), the GEMC-FPRINT will create reports using the same custom User, Area and Zone descriptions which have been entered into the downloader software (see PROGRAMMING). The GEMC-FPRINT provides signal and ground isolation between the control panel and the printer and protects the control panel from shorts, transients and surges that may emanate from the printer or the associated cabling.

# **SPECIFICATIONS**

**Electrical Ratings** 

**Input Power:** 12VDC nominal; 90mA maximum.

Output Power: N/A.

# **MAXIMUM WIRE LENGTH**

The GEMC-FPRINT may be mounted on the control panel fire bus up to 500 feet (with #22AWG wire) or 1000 feet (with #18AWG wire) from the control panel. The Parallel Printer must be mounted with 20 feet (6.1m) of the GEMC-FPRINT module and shall reside in the same room as the GEMC-FPRINT with no intervening walls or barriers.

# SYSTEM REQUIREMENTS

The following system hardware is required:

- Gemini C-Series Control Panel
- Standard PC Printer Cable (DB25 to 36 pin Centronics)
- Parallel Printer Dot Matrix printer preferred.
- NOT compatible with "Win Printers" or Laser Jet / Ink Jet printers requiring a Windows-based operating system.

### **PHYSICAL**

Dimensions (HxWxD): 35/8" x 7" x 15/8"

### **AGENCY LISTINGS**

UL365: Police Station Alarm Units

UL609: Local Burglar Alarm Units and Systems

UL864 9th Edition: Commercial Fire
