PLANET WAVES™

Planet Waves Tools are designed to facilitate the cleanest, most efficient installations.

UNIVERSAL REMOTE TESTER

The CBLT01 Universal Tester is compatible with BNC, F, and RCA connectors. It is specifically designed for Planet Waves Cable Station connectors. For long-run or multi-room installations, simply use two cable testers and take advantage of the send/receive signal feature!

CUTTER/SCREWDRIVER KIT

The CITK01 Cutter/Screwdriver Kit features an ergonomically-designed screwdriver, which will quickly become a favorite. Easy to hold and twist with one hand, it makes terminating Planet Waves cable a breeze. The accompanying cutter is an essential first step to clean, precise custom cables.

CABLE CUTTER/TESTER

Planet Waves' PW-CCT Cable Cutter/Tester tests for ground and tip continuity in RCA, F, and BNC* cables. This tester includes a short, razor-style cutter perfect for making Planet Waves cables. PW-CCT also features LED indicators. Batteries included.

*Additional adapters required.

SCREWDRIVER WITH MAGNET

The SD01 Screwdriver is designed for use with the patented Planet Waves Termination system. It includes an strong magnetic collar for screw storage during termination.
