concord

Concord® 5" TouchScreen

OVERVIEW

The Concord 5" TouchScreen from Interlogix is a full-color, full-control LCD screen that complements Concord security systems for additional safety and peace of mind. The easy-to-use touch screen provides system owners with at-a-glance home status information, letting them easily and conveniently control their Concord system.

Multiple 5" TouchScreens may be used on a Concord system, making it an ideal way to add several points of control throughout a home or business. The exact number of touch screens that can be added is dependent on the power requirements of other devices that are configured on the system.
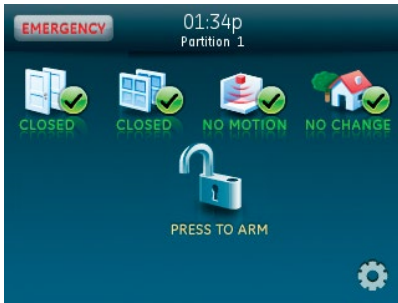

Power to the touch screen is supplied and backed up by the panel battery. An integrated speaker provides chime and siren sounds, notifying system owners of trouble and alarm conditions. Both wall plate and table top stands are included to accommodate wall mounting or table top installations.

Note: The Concord 5" TouchScreen supports comprehensive system programming and is compatible with Concord 4 security systems version 4.5 or later.
