OVERVIEW

TruVision IP Megapixel Wi-Fi Wedge IR Camera from Interlogix brings state-of-the-art, high-definition images to the residential security segment. Designed specifically for use with the UltraSecure Series of smart security products by Interlogix, this camera offers live video and clip recording that can be triggered by an intrusion event and managed through the UltraSync™ mobile application.

This Wi-Fi camera is based on the Wi-Fi standards of IEEE802.11b/g/n and operates in the 2.4GHz range.

Transmission rates of up to 150Mbps are supported and secure wireless communication is achieved via 64/128-bit WEP, WPA/WPA2 and WPA-PSK/WPA2-PSK, and WPS wireless encryption standards.

Setup is simplified using an integrated browser. Onboard storage via micro SD card adds recorded clips without the need of NVR's or cloud storage.

The TruVision IP Megapixel Wi-Fi Wedge Camera is designed for harsh indoor/outdoor environments in marine or land applications or for locations where running cable is not feasible.

This Wi-Fi camera has an IK8 impact resistant rating, and is IP66 rated for dust and moisture. The enhanced environmental design includes a housing cover made of plastic, stainless steel screws that meet SUS316 standards for improved corrosion resistance and a special protective coating material for the camera base.
