

Command Button

OVERVIEW

Compatible with Interlogix® control panels paired with Alarm.com® interactive services and with UltraSync® systems, the Interlogix Command Button allows for up to three different scenes and automations to be triggered by the push of a single wireless button. Utilizing the smart-home automation capabilities of Alarm.com and UltraSync, users can assign the Command Button's actions to be the initiating device for enabling and disabling a variety of smart devices, scenes and rules.

The compact and low-profile design of the Command Button allows for easy and versatile mounting on various types of surfaces. Control of lights, locks, thermostats and other smart devices that are paired with Interlogix security panels is easier than ever.

Designed with the smart home in mind, the Interlogix Command Button is an ideal solution for bringing enhanced automation capability to every room in the home.

Specifications

Compatibility	Interlogix 319.5MHz control panels/receivers (must utilize Alarm.com or UltraSync interactive services)
Battery	CR-2032
Transmitter frequency	319.5MHz
Typical battery life	Up to 5 years at 68°F (20°C)
Environmental	
Operating temperature range	32°F to 120°F (0°C to 49°C)
Storage temperature range	30°F to 140°F (-34°C to 60°C)
Physical	
Dimensions (WxDxH)	1.2 x 1.2 x 0.4 in. (25.4 x 25.4 x 10.1mm)

STANDARD FEATURES

- Compact design that is half the size of many other micro door and window sensors
- Single-tap, double-tap and tap-and-hold commands that allow for up to three different automations utilizing three different zones
- Square red LED for visual indication of wireless transmissions
- 5-year battery life with an easily replaceable pre-installed CR-2032 coin-cell battery
- Low Battery reporting that indicates when batteries need replacing before they expire
- Fully supervised device that sends signals every 64 minutes to the security panel to support uninterrupted performance
