# Thank you for purchasing the EXeARC1

At Simplified MFG, we strive to make reliable cutting-edge devices and the EXeARC1 is the result of a commitment to deliver cutting-edge devices first. First means nothing if it is not reliable. The EXeARC1 was constructed with the highest grade components available and should provide years of reliable service. Please keep this manual for future reference.

## Surge protection device recommended

The EXeARC1 is designed to operate in the HDMI realm with an external 24V supply at one end. The supply is very robust, but a surge device is always good insurance in electrically active storms or areas where the power grid is unreliable. If connected to satellite or cable boxes, the HDSURGE is recommended to prevent surges through the HDMI cable.
