

## eXtreme® Cat 6 Component-Rated UTP QuickPort® Jack

### APPLICATION

The eXtreme Cat 6 jack is designed to be used with all QuickPort compatible products. The jack includes patented Retention Force Technology™ which promotes consistent performance over the life of the system. It features unique pair separation towers allowing for quicker and easier terminations. The jack is built on a 180-degree configuration with the punch field in the back, allowing for rear termination.

### SPECIFICATION

The jack shall meet or exceed the requirements for channel and component-level electrical transmission performance as described in ANSI/TIA-568.2-D (Cat 6), ISO/IEC 11801-1 (Class E), and EN 50173-1 (Class E). The jack shall be compliant with ANSI/TIA-1096-A, cULus listed, and be independently verified for electrical transmission performance and power delivery. In addition to Category 6 compliance, the jack shall have the ability to support high megabit and shared-sheath applications. All plastics used in construction of the jack bodies shall be fire retardant with a UL flammability rating of 94V-0. Termination of all jacks shall be 110-type insulation displacement connectors (IDC). The jack shall provide a ledge directly adjacent to the 110-style termination against which the wires can be terminated and cut in one action by the installation craftsperson. Jack wiring is universal and will accommodate installation color codes for T568A and T568B wiring schemes. The jack shall be individual snap-in style and the termination field shall be in the rear for easy access. The jack shall include a snap on dust cap with high pullout force and shall fit in a variety of telecommunications wallplates, outlets, and field-configurable patch panels and patch blocks. It shall exceed IEEE 802.3bt standard up to 0.5 amps per conductor (100 watts) continuously.
