

# IQ PANEL 4

## INSTALLATION MANUAL

IQ Panel 4  
Software Version 4.1.0

The IQ Panel 4 is an All-In-One 7" (17.8cm) touchscreen built with a built-in camera, providing full security and smart home functionality in an easy to use interface.

## INCLUDED IN BOX

IQ Panel 4

Power  
Supply

## ABOUT THIS GUIDE

This document outlines the basic hardware specifications and software directions to install and customize the IQ Panel 4. Note that the information presented is not comprehensive, but is specifically dedicated to those menus, features, and systems accessible solely to those with the proper installation code. Features accessible to users and installers alike are outlined in the IQ Panel 4 User Guide. In this document, reference to “EN Grade 2” refers to EN50131 Grade 2 Certified product. The information contained herein is proprietary, and is solely owned by Qolsys Inc. Any reproduction, modification or distribution without permission is strictly prohibited.

# PANEL OVERVIEW

For US and CANADA: Warning: This Product should be installed in accordance with the National Fire Alarm Code, ANSI/NFPA 72, (National Fire Protection Association, Batterymarch Park, Quincy, MA 02269) and with National Electric Code, ANSI/NFPA 70. Printed information describing proper installation, operation, testing, maintenance, evacuation planning, and repair service is to be provided with this Product. In Canada the product shall be installed in accordance with the Standard for the Installation of Residential Fire Warning Systems, CAN/ULC-S540.

Warning: For Canadian installations this Product and all sensors associated with it (collectively, the "System") should be tested once a week. The test shall be performed also with primary DC power de-energized. For recommended smoke detectors maintenance instructions refer to user manual associated with compatible Qolsys model Q55110-840 and PowerG model PG9936 smoke detectors.

For All Countries: Warning: This Product should be installed in accordance with the National and Local Fire Codes and National and Local Electrical Codes. Printed information describing proper installation, operation, testing, maintenance, evacuation planning, repair service, recycling and disposal is to be provided with this Product. Warning: For all installations this Product and all sensors associated with it (collectively, the "System") should be tested once a week. The test shall be performed also with primary DC power de-energized. For all Sensors, Detectors, and other accessories, follow the recommended maintenance instructions for each device.

## EXTERIOR BACK

## INTERIOR

# INSTALLING THE PANEL

# INSTALLING THE PANEL

## WALL MOUNT

Note: For UL/ULC Commercial Burg installations (UL2610/ULC-S304 Security Level II compliant) and EN Grade 2 installations use only wall mount option

This product when installed as per these instructions does not present the risk of fire, electric shock, or injury to persons.

1. With a small phillips screwdriver, undo the locking screw from the back of the panel and remove the SmartMount backplate.

1. Mount the backplate to the wall using flat head screws\* and appropriate wall anchors if needed, ensuring it is level.

2. A screw is required in break-away wall tamper for UL 2610 and EN Grade 2 installations.

3. Connect the power supply to the barrel jack on the back of the panel or to the (+) and (-) terminals on the backplate if using a custom length wire.

1. Latch the top of the IQ Panel 4 onto the SmartMount backplate.

2. Swing the panel down towards the backplate and press firmly against the wall.

If using a custom length wire, power terminals will automatically connect and provide power to the IQ Panel.

1. With a small phillips screwdriver, screw in the locking screw from the bottom of the panel to secure it to the wall.

\*Screws shall be a minimum of 1" in length (25.4mm), size #6 (M3.5)

## TABLE STAND (OPTIONAL)

Do not use for UL2610 or EN Grade 2 or equivalent installations

1. With a small Phillips screwdriver, undo the locking screw from the back of the panel, remove the SmartMount backplate and discard.

1. With the included power supply and cable, plug the barrel connector into the barrel jack as shown above.

Be sure the barrel connector properly seated.

1. Locate the SmartMount table stand and insert the hooks into the back of the panel, then swing down and press into place.

Be sure that the power wire is routed out the middle of the table stand using the provided slot.

1. With a small Phillips screwdriver, screw in the locking screw from the bottom of the panel to secure it to the table stand.

## IQ BASE SPEAKER (OPTIONAL)

Do not use for UL2610 or EN Grade 2 or equivalent installations

1. With a small Phillips screwdriver, undo the locking screw from the back of the panel, remove the SmartMount backplate and discard.

1. Locate the IQ Base with SmartMount and connect the power cable from the IQ Base into the **BLACK** connector inside the IQ Panel 4. Refer to Interior Diagram on Page 7

Insert the top hooks into the back of the panel, then swing down and press into place.

1. With a small Phillips screwdriver, screw in the locking screw from the bottom of the panel to secure it to the IQ Base.

1. With the included power supply and cable, plug the barrel connector into the barrel jack on the bottom of the IQ Base as shown above.

Be sure the barrel is pushed all the way in.

## WIRING DIAGRAM

## NOTES

**IMPORTANT IF USING CUSTOM LENGTH WIRE:**

- 7v=DC Transformer: Use 18AWG (0.75mm<sup>2</sup>) wire no longer than 98.5ft (30m) to ensure sufficient power is received at the panel.

\* The minimum permissible wire size shall not be smaller than 22 AWG (0.33mm<sup>2</sup>)

\*\* 7v=DC power supply output shall not exceed 15VA (15W) under any conditions

## POWERING THE PANEL

Note: This unit must be powered by a 24-hour, 120 V, 60 Hz or 230-240 VAC, 50 Hz circuit (as appropriate for your country) that cannot be turned off by a switch, dimmer, or Residual Current Device. Failure to provide this circuit may prevent it from providing constant protection. Power supply shall be located within same room as control unit.

Connect power supply.

**WARNING!** Use **included 7v=DC** Power Supply **ONLY**

If using the provided cable, the “striped” wire is (+)

Note: Power supply shall be located within same room as control unit

Press and hold the power button on the right side of the panel for 3 seconds to power up.

## FLEXTILT CAMERA ADJUSTMENT

FlexTilt camera adjustment allows the built-in Panel Camera to be angled up or down depending on the installation need. This is especially helpful when wall mounting over an existing keypad location that may be higher or lower than usual, or when table stand mounting.

1. Use a small phillips screw driver to adjust the FlexTilt screw on the top of the Panel to achieve the desired camera angle.

**NOTE:** Turning the screw clockwise angles the camera down. Turning the screw counter-clockwise angles the camera up.

2. Arm/Disarm the Panel to capture a Disarm Photo and test the FlexTilt position. Adjust as needed.

# USER INTERFACE

## HOME SCREEN OVERVIEW

The home screen is divided into three sections. The header shows the date & time, today's weather, message center and the Settings tray. The Primary interface shows arming options and sensor status & partition select. The footer shows panic options and additional pages.

## MESSAGE CENTER

The header contains the pull down settings tray, the weather icon, time/date and a message icon in the upper right portion of the screen where you will find Security Provider messages and contact info, alerts, video tutorials and FAQ's

11:18 AM  
09/15/16

CONTACT US

This is where you will find the Security Provider's Contact Information

VIDEO TUTORIALS

This is where you will find Video Tutorials to help with common questions

ALERTS/ALARMS 1

This is where you will find Panel Alerts/Alarms notifications

MESSAGES

This is where you will find messages from the Security Provider

## SETTINGS TRAY

To access the Settings tray swipe down on the bar at the top of the screen. The Settings tray has quick access to system, battery, Wi-Fi, Bluetooth & cellular status as well as volume control, brightness, a lock screen icon and other quick settings.

## FIND IT

Swipe down for access

When partitions or screen lock are **ENABLED**, a Lock Screen icon replaces the Status icon. Touch this icon to switch between partitions.

When partitions are **DISABLED**, a Status icon resides in the upper left corner of the settings tray. Touch this icon to return to the security page.

# PROGRAMMING

## SCREEN LOCK

Note: This feature has not been evaluated for EN Grade 2

When the “Screen Lock” or “Partitions” setting are enabled, a lock screen will be presented once the panel has been woken from either a touch on the screen or pressing the wake/sleep button on the side of the panel. This prevents unauthorized access to the panel and/or one partition from accessing another as well as managing permissions to “Advanced Settings”.

4 DIGIT SCREEN LOCK

6 DIGIT SCREEN LOCK

## SETTINGS

The Settings page allows quick access to various simple features & settings that do not require the protection of a Dealer, Installer or Master code to be changed.

Setting	Description
Display	Adjust brightness, font size & 12/24 hour time as well as adaptive brightness or night light mode
Weather Temperature	Toggle between Fahrenheit and Celsius
Status	View the "Current Status" of security sensors: Zone #, Name, Status (Open, Close, Active, Idle, Tamper, Failure), Battery and sensor History. Also view "Alarms" and "History" for security sensors globally
Z-Wave™ Device Status	View the "Current Status" of Z-Wave devices: Name, Type, Status (Normal, Failure), and Battery. Also view "Alerts" and "History" for Z-Wave globally
Other Z-Wave Devices	Shows Z-Wave devices that are learned into the panel but that are not part of the main user interface (Lights, Locks, Thermostats & Garage Doors)

## FIND IT

Swipe down for access

## SETTINGS

Setting	Description
EU Events	Display events as required for EN Grade 2. <b>NOTE:</b> This icon will only appear when the "En Grade 2" setting is Enabled.
Automation	<p>Add, Edit or manage local lighting automation rules. These rules are separate from any cloud based rules that may be set through Alarm.com. Examples of possible rules are as follows:</p> <ul style="list-style-type: none"> <li>- <b>Night:</b> Turns light on at 7pm and off at 6am</li> <li>- <b>Evening:</b> Turns light on at 7pm and off at 11pm</li> <li>- <b>Front Door:</b> Turns light on for 15mins when Front Door opens between 5pm and 7am (must have a sensor with the default quick name "Front Door" added in the panel)</li> <li>- <b>Doorbell:</b> Turns light on between 5pm and 7am for 15 mins when Doorbell is activated (must have a sensor with the default quick name "Doorbell" added in the panel)</li> </ul>
Activity Monitor	<p>Activity Monitor allows access to disarm sensors that are programmed as 24 hours zones, such as Sensor Groups 8, 9 &amp; 25. A valid Master, User or Guest code is required to control 24 hour activity sensors. 2 options are provided:</p> <ul style="list-style-type: none"> <li>- <b>Quick Access:</b> 300 second temporary access</li> <li>- <b>Deactivate:</b> Disarms 24 hour sensors until they are re-activated manually</li> </ul>
License	Qolsys End User License Agreement
Advanced Settings	Access advanced settings & programming. A valid Dealer (default 2222), Installer (default 1111) or Master Code (default 1234) is required
Smart Energy Optimizer	Shift energy usage to off-peak hours (thermostats) and reduce energy usage during on-peak hours

## ADVANCED SETTINGS

To access the Advanced Settings menu pull down the Settings tray at the top of the screen, select “Settings” and then “Advanced Settings”. Enter your dealer, installer or master code. The code used to enter Advanced Settings determines the level of access. When using partitions the code entered at the screen lock determines the access level for Advanced Settings.

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
Loss of Supervisory Signals for Z-Wave	4	Select the length in hours (4, 24) before reporting a loss of supervision on Z-Wave Sirens.
Loss of Supervisory Signals for Non Emergency Sensors	24	Select the length in hours (4, 12, 24) before reporting a loss of supervision on security devices. <b>NOTE:</b> For UL/cUL Resi Fire and UL Commercial Burg (UL2610) the wireless supervision window for Non-Emergency sensors (all intrusion sensors) shall be set to 4h. These devices shall not be used for EN Grade 2 compliant installations
Loss of Supervisory Signals for PowerG Non Emergency Sensors	24	Select the length of time (20, 30 min, 1, 2, 4, 12, 24 hours) before reporting a loss of supervision on PowerG security devices. <b>NOTE:</b> For UL/cUL Resi Fire and UL Commercial Burg (UL2610) the wireless supervision window for Non-Emergency sensors (all intrusion sensors) shall be set to 4h. For EN Grade 2, the supervision window shall be set for 20 minutes.
Loss of Cell Signal Timeout	30	Select the length in minutes (10-120) before reporting a loss in cellular signal. <b>NOTE:</b> For UL Commercial Burg (UL2610) the cell supervision is hardcoded to 200s
Communication Test	Monthly	Choose Never, Daily, Weekly or Monthly when enabling the communication test. <b>NOTE:</b> For UL Resi Fire (UL985) the test frequency shall be set to Weekly. By default the system will be set to Weekly if UL985 is selected on Alarm.com
Communication Test Start Time	Randomized	Select the time of day that the panel will send its Communication Test. If no time is selected the time will automatically be randomized.

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
<p><b>SIA Limits</b></p> <p><b>NOTE:</b> For UL resi burg set entry delay to 45 sec and exit delay to max 120 sec. For UL Commercial Burg (UL2610) maximum entry and exit delay should not exceed 60 sec.</p> <p><b>NOTE:</b> For ULC Security Level I (resi burg) set entry delay to 180 sec. For ULC Security Level II (commercial burg) set entry delay to 60 sec and exit delay to 45 sec max.</p> <p><b>NOTE:</b> For EN Grade 2 installations set Entry Delay to 45 sec and Exit Delay to 30 sec.</p>	<p>Enabled</p>	<p>When <b>enabled</b>, the range for entry and exit delays is as follows: -Entry delay: 30-240 seconds, Exit Delay: 45-254 seconds</p> <p>When <b>disabled</b>, the range for entry and exit delays are as follows: -Entry delay: 5 to 240 seconds, Exit delay: 5 to 254 seconds</p> <p>When <b>enabled</b> the range for Dialer Delay is: 15 to 45 seconds When <b>disabled</b> the range for Dialer Delay is: 0 to 254 seconds</p>
<p><b>EN Grade 2</b></p>	<p>Disabled</p>	<p>The setting enables EN Grade 2 compliance on the Panel. When Enabled, the following behaviors and/or settings are changed automatically:</p> <ul style="list-style-type: none"> <li>- Entry Procedure (EU) - follows entry procedures and alarm transmission delays specified by EN 50131</li> <li>- Disables the "Auto Bypass" setting so that the Panel will protest arming when sensor and panel trouble conditions are present (i.e. Open, Tamper, Low Battery, etc)</li> <li>- Trouble condition alerts can not be acknowledged until the condition is resolved</li> <li>- Trouble beeps are expanded to include fault indications required by EN 50131</li> <li>- "Screen Lock" setting is enabled automatically. Screen will lock 30 seconds after Disarming</li> <li>- A new icon called "EU Events" is added to the "Settings" page which records mandatory history events specified by EN 50131.</li> <li>- "Loss of Supervisory Signals for PowerG Non-Emergency Sensors" is set to 2 hours by default.</li> <li>- "LED Indicator" setting is Disabled automatically.</li> <li>- "Dealer or Installer Access Requires User Permission" setting is Enabled automatically.</li> </ul>

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
EU Event Swinger Shutdown Count	3	Determines the number of times a particular event will record to “EU Events” log before shutdown. The count (3-10) will reset after and arm or disarm event. <b>NOTE:</b> This setting is greyed out and not selectable unless EN Grade 2 is Enabled.
Favorite Languages	English/Español	Set the Panel's language toggle to your favorite 2 languages. Choose from English (United States), Français (Canada), Español (Estados Unidos), Italiano (Italia), Nederlands (Nederland), Norsk bokmål (Norge), Svenska (Sverige), Íslenska (Ísland), Deutsch (Deutschland), Magyar, (Magyarország), Dansk (Danmark), Română (România), Portuguesa (Portugal), Polskie (Polska), Suomalainen (Suomi), Français (France), Español (España), Hebrew.
LED Indicator	Enabled	Manually Enable/Disable the LED Status Light on the panel. <b>NOTE:</b> This setting will automatically be set to Disabled when EN Grade 2 is Enabled.
6 Digit User Code	Disabled	This is a global setting for all codes used on the panel and changes the input from 4 digits to 6 digits. When enabled, a “00” will be appended to all existing 4 digit codes
Commercial Sensor and Device Names	Disabled	Enabling this features changes the sensor name vocabulary from residential naming to commercial naming.
Wellness Support	Disabled	When Enabled, Auxiliary Pendants learned into Group 6 behave like a traditional PERS pendant. The system generates a signal to Alarm.com but does not generate a loud local alarm that needs to be disarmed between button presses. <b>NOTE:</b> This feature can not be enabled if Partitions are enabled.

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
WI-Fi Warning Messages	Enabled	When enabled the panel display will automatically revert to the Manage My System page as the default page if Wi-Fi is not connected to encourage end users to stay connected.
Partitions	Disabled	Create up to 4 partitions by enabling this feature.
Other Automation	Disabled	When Enabled, the Panel can support Zigbee Automation devices as well as Deako Lighting integrations. These devices are added through the “Other Automation” icon that will appear under the “Devices” icon. <b>NOTE:</b> Zigbee integration requires that a Zigbee daughter card be installed in the panel. Not evaluated for UKCA or CE/EN Grade 2.
Zwave Frequency Region	Varies by Region	Sets automatically based on install region and Z-Wave hardware installed in the panel or manually choose between United States, European Union, Australia/New Zealand, Hong Kong, Malaysia, India, Israel, Russia, China, Japan or Korea.
PowerG Camera Image Capture Count	1	Determines the number of Images to be uploaded by any PowerG PIR CAM when triggered during an Alarm. Choose between 1 or 10.
PowerG Camera Alarm Image Upload Limit	Enabled	Determines if PowerG PIR CAMs upload only images from the first motion event during an arming period (Enabled) or if they will upload images from the 1st, 2nd & 3rd motion events for that arming period (Disabled).
Security Page	Enabled	Choose whether or not you want the “Security Page” to appear as part of primary user interface on the panel. <b>NOTE:</b> Before the Security Page can be disabled, you must enable the “Wellness Page” or the “Home Control Page”. This feature can not be disabled if Partitions are enabled.

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
Wellness Page	Disabled	Choose whether or not you want the “Wellness Page” to appear as part of primary user interface on the panel. <b>NOTE:</b> This feature can not be enabled if Partitions are enabled.
Check-in/Check-Out	Disabled	Choose whether or not you want a “Check-in” and “Check-out” button to appear as part of the Wellness Page UI. This feature allows a nurse to check in/out and have their picture taken by the panel as record of their visit. <b>NOTE:</b> The Wellness Page must be enabled in order for this feature to also be enabled.
Home Control Page	Disabled	Choose whether or not you want the “Home Control Page” to appear as part of primary user interface on the panel. <b>NOTE:</b> Before the Home Control Page can be enabled there must be at least two (2) different “types” of automation devices added to the panel (Lights, Locks or Thermostats). This feature can not be enabled if Partitions are enabled.
Door Lock Page	Enabled	Choose whether or not you want the “Door Lock Page” to appear as part of primary user interface on the panel anytime a Door Lock is added as a device.
Thermostat Page	Enabled	Choose whether or not you want the “Thermostat Page” to appear as part of primary user interface on the panel anytime a Thermostat is added as a device.
Scenes Support	Enabled	When enabled, a new icon will appear in the panel UI on left hand footer enabling the use of Scenes that have been created on Alarm.com. <b>NOTE:</b> This feature can not be enabled if Partitions are enabled.
Stream Live Video Cameras to IQ Remote	Disabled	This setting allows a user to view cameras from the IQ Remote. When enabled, Cameras that are streaming to the primary panel will also stream to the IQ Remote.

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
PowerG RF Jam Detection	Disabled	When enabled the system can detect when an unusual amount of RF signals are being transmitted in the PowerG spectrum leading to a potential loss of connectivity. This event reports to the central station when enabled. Choose from Disabled, UL20/20 or En 30/60. <b>NOTE:</b> For EN Grade 2 certified installations the option shall be enabled and set to EN 30/60.
Jam Detection	Disabled	When enabled the system can detect when an unusual amount of RF signals are being transmitted on the frequency of the legacy daughter card installed in the panel (319.5MHz, 345MHz or 433MHz) leading to a potential loss of connectivity. This event reports to the central station when enabled. <b>NOTE:</b> Not evaluated for UK for CE/EN Grade 2
Jam Detection Local Alarm <b>NOTE:</b> Not evaluated by UL/cUL, UKCA or EN Grade 2	Disabled	When enabled the system will sound a local alarm. "Jam Detection" must be active for this to function properly.
SRF Jam Sensitivity Level <b>NOTE:</b> Not evaluated for UK or CE/EN Grade 2	Normal	Choose between HIGH and NORMAL sensitivity levels.
Zigbee Jam Detection	Disabled	Future use.
Zigbeen Jam Sensitivity Level	Disabled	Future use.
Allow Master Code to Access Security Sensors	Disabled	Allow the Master Code to access to the Security Sensor icon, including Auto Learn Sensor, Add Sensor, Edit Sensor, Delete Sensor, Sensor Status & Sensor Group.
Open/Close Reports Allowed For Auto Learn	Enabled	Rather than sending a tamper to auto learn a sensor, enabling this will allow an open/close of the sensor to trigger auto learn.

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
Panel Glass Break Detector NOTE: Not evaluated for UK or CE/EN Grade 2	Disabled	Creates an independent zone that leverages the panel's built-in microphones to act as a glass break detector. This will fall into the zone order at the time you enable this feature. NOTE: This feature can not be Enabled if Panel Ambient Noise Detection is Enabled.
Panel Motion Detector NOTE: Not evaluated for UK or CE/EN Grade 2	Disabled	Creates an independent zone that leverages the panel's built-in camera to act as an activity motion detector. This will fall into the zone order at the time you enable this feature. Motion can trip once every 4 minutes. NOTE: The panel motion detector is for activity monitoring and automation only (Group 25) and will not create an alarm condition or act as a security PIR.
Panel Ambient Noise Detector	Disabled	When Enabled, the Panel's built-in microphones can monitor for loud noise detection above a settable dB threshold and generate an alert. Useful for MDU, apartments and short term rentals where noise complaints are a concern. After an alert is generated, a 30 second cool down period is instituted. NOTE: This feature can not be Enabled if Panel Glass Break Detector is Enabled.
Ambient Noise Threshold	85 dB	Set the threshold at which the Panel Ambient Noise Detector determines there is enough noise to generate an alert. Choose from values between 75 and 95 dB. NOTE: This setting is greyed out and not selectable unless Panel Ambient Noise Detector is Enabled.
Noise Detector Duration	20 min	Determines the length of time for which the panel must detect noise above the threshold level in order to generate a noise notification.
Noise Detector Popup	Disabled	Determines whether the panel indicates locally on the screen that noise event has been detected.

## INSTALLER/DEALER SETTINGS

Setting	Default	Description
Zigbee Network Type <b>NOTE:</b> Not evaluated for UK or CE/EN Grade 2	Home Automation and Security	Choose which type of Zigbee network you'd like to use. Options are Home Automation and Security or Smart Energy. <b>NOTE:</b> This setting only appears when a Zigbee daughter card is installed in the Panel. When paired to UL Listed Zigbee devices, Zigbee can be used for UL/ULC Listed Residential Fire and Burglary applications.
Light Reporting (PowerG)	Disabled	When Enabled, PowerG devices that support light sensor capabilities report light status to the Panel. Data is stored for future use.
Temperature Reporting (PowerG)	Disabled	When Enabled, PowerG devices that support temperature measurement, report temperature information to the Panel. Data is stored for future use.
Delete All Sensors	Deletes all security sensors and Bluetooth devices programmed in the panel.	
Delete All Z-Wave Devices	Performs a factory reset on the Z-Wave controller. Does not factory reset previously included devices.	
Zigbee Reset	Deletes all Zigbee sensors and resets the Zigbee Network.	
Master Reset*	Restores panel to factory settings and erases all content.	
Data Recycle	This feature erases all User data previously stored. (Wi-Fi SSID & Password, User Codes, Panel Camera Images, Custom Photo Frame Images, Message Center & Panel Event History).	
IQ Remote Reset Authentication	Disabled	If Enabled, the IQ Remote will require authentication (Dealer or Installer Code) to master reset it.

## SYSTEM LOGS

System logs allow the panel to send non-customer identifying information to the server for troubleshooting and bug identification.

Setting	Default	Description
Upload logs to the server	<i>Requires manual push</i>	Tell the panel to begin uploading a history of its activity to the server. This information is used to troubleshoot bugs and diagnose panel problems. The panel will upload any logs saved in its memory
Auto Upload Logs	Disabled	Automatically upload the system's log to the servers every 24 hours
Log Level	Debug	<p>Tell the panel how much information to record in log files.</p> <p><b>No log output:</b> No information recorded  <b>Fatal:</b> Record fatal or severely problematic information only  <b>Error:</b> Record all errors and fatal issues  <b>Warn:</b> Record warnings, errors, and fatal issues  <b>Info:</b> Record all generic, non-customer related information  <b>Debug:</b> Record diagnostic messages, Info, Warnings, Errors, and Fatal issues  <b>Verbose:</b> Record all non-customer identifying information</p>

## SIREN AND ALARMS

### Siren and Alarms

Change siren and alarm settings for certain types of alarm events.

Setting	Default	Description
Panel Sirens	All Sirens On	<p><b>All Sirens Off:</b> This will disable the siren for all alarm types, except for life safety devices, including any hardwire or wireless external sirens.</p> <p><b>All Sirens On:</b> This is the default setting which enables the siren for all alarms</p> <p><b>Installer/Test Mode:</b> This disables the siren for all alarm types including any paired or hardwired external sirens for 30 mins then all sirens are re-enabled</p>
Siren Annunciation	Disabled	<p>Panel siren pauses periodically to announce which locations have triggered the alarm.</p> <p><b>NOTE:</b> for UL/cUL this feature is not allowed for Fire, CO, Burglar Alarm</p>
Fire Verification	Disabled	<p>When enabled, panel requires two fire events from smoke detector (one detector twice or two detectors once each)</p> <p><b>NOTE:</b> Not allowed on UL/cUL installations</p>

## SIREN AND ALARMS

Setting	Default	Description
Burglary Alarm Confirmation	Disabled	When enabled, a confirmed alarm requires two sequential burglary alarms within the Burglary Alarm Confirmation Timer window. <b>NOTE:</b> This setting is greyed out and unavailable unless EN Grade 2 is enabled.
Burglary Alarm Confirmation Timer	30	Timer used for Burglary Alarm Confirmation. <b>NOTE:</b> This setting is greyed out and unavailable unless EN Grade 2 is enabled.
Severe Weather Siren Warning	Enabled	When enabled, siren will sound when the panel receives a severe weather alert. When disabled, panel will use severe weather chime
Dialer Delay <b>NOTE:</b> Shall not be used on EN Grade 2	:30	Amount of time (in seconds) before panel will attempt call to central station after an alarm event is triggered When SIA Limits enabled: :15 to :45 seconds When SIA Limits disabled: :0 to :254 seconds
Siren Timeout	4 min	Determine how long before siren stops sounding during an alarm event (4 minutes to 15 minutes). <b>NOTE:</b> For UL/cUL residential fire/burg applications the minimum bell timeout shall be set to 5 min. For UL Commercial Burglary installations, minimum bell time out shall be set to 15 minutes. For EN Grade 2 the minimum bell timeout shall be 90 sec and maximum bell timeout shall not exceed local regulations.
Water/Freeze Siren/Temperature	Enabled	When enabled, siren will sound when a water or freeze detector is triggered. When disabled, the panel emits a “water” tone

## SIREN AND ALARMS

Setting	Default	Description
PowerG Smoke Detector Siren	Fire Alarms Only	When set to "Fire Alarms Only", PowerG Smoke Detectors that are learned into the system will only sound during fire alarm events. When set to "All Alarms", PowerG Smoke Detectors will act as additional wireless sirens and will sound during all alarm events.
Police Panic	Enabled	Allows Police Panic to be enabled or disabled.
Fire Panic	Enabled	Allows Fire Panic to be enabled or disabled.
Auxiliary Panic	Enabled	Allows Auxiliary Panic to be enabled or disabled.
Audible Siren for Wireless Supervisory Failures	Disabled	When this setting is enabled and the system is armed, supervisory failures for non-emergency sensors are treated the same as a tamper and cause an alarm to be generated.
Allow Master Code To Access Siren and Alarms	Disabled	Allow the master code to access these features and settings. <b>NOTE:</b> not allowed for UL/cUL.

## SECURITY AND ARMING

### Security and Arming

Change arming settings, entry and exit delays, enable Duress Authentication and more.

Setting	Default	Description
Dealer Code*	2222	Code to access all options
Installer Code	1111	Code to access installer options only
Swinger Shutdown	Enabled	Determines whether the panel allows the same sensor to trip the alarm more than once (enabled), or not (disabled)
Swinger Shutdown Count	1	Determines the number of times the same sensor is allowed to trip the alarm during the same arming period (1-6). Swinger Shutdown must be enabled in order for this setting to work. <b>NOTE:</b> For EN Grade 2 it shall be set to 3
Panel Tamper	Enabled	This setting enables or disables the Panel Tamper switch on the back of the panel. <b>NOTE:</b> for UL/cUL and EN Grade 2 this setting shall be Enabled
Screen Lock	Disabled	When enabled, a screen lock page will appear. Screen lock restricts access to the panel based on valid user codes. <b>NOTE:</b> This setting is required and is automatically enabled when Partitions are enabled. It is also enabled for "EN Grade 2"

SECURITY AND ARMING

\* Additional options available only through the Dealer Code.

## SECURITY AND ARMING

Setting	Default	Description
Secure Arming	Disabled	Require user code for arming the panel. <b>NOTE:</b> this option shall be enabled for UL/cUL and EN Grade 2
Refuse Arming When Battery Low	Disabled	Will not allow panel to arm if battery is low (below 8%). <b>NOTE:</b> This option shall be enabled for EN Grade 2
Auto Bypass	Enabled	Toggle whether or not to bypass open or tampered sensors automatically. <b>NOTE:</b> Shall be disabled for UL/cUL. This setting is turned off and greyed out when the "En Grade 2" setting is enabled.
Final Exit Door Arming	Disabled	When enabled, if Arm Away is selected at the panel then there is no timed exit delay. Instead, the system is not fully armed until an Entry/Exit door is violated. <b>NOTE:</b> This setting is greyed out an unavailable unless EN Grade 2 is enabled.
Auto Stay	Enabled	If panel is armed "Away" but a delay door is not opened, the panel assumes you are still home and changes arming to "Stay" mode
Arm Stay - No Delay	Enabled	Arm stay immediately with no countdown timer
Auto Exit Time Extension	Enabled	Automatically extend countdown timer if delay door is opened during countdown process a second time
Keyfob Instant Arming	Enabled	When enabled, turns off exit delay if keyfob is used to arm the system
Keyfob Alarm Disarm	Disabled	When enabled this will Allow a keyfob to disarm alarm events.

## SECURITY AND ARMING

Setting	Default	Description
Keyfob Disarming	Enabled	When Disabled, a Keyfob will not be able to disarm the panel
Engineer's Reset	Disabled	If a confirmed alarm occurs on a burglary zone, the system is locked out after disarming until a 5 digit reset code provided by the installer is entered in.
Allow Master Code to Access Security and Arming	Disabled	Allow the master code to access these features and settings. <b>NOTE:</b> this option shall be disabled for UL/cUL. This option shall be enabled for UL Commercial Burg installations.
Normal Entry Delay	30 Secs	How much time users have to enter their code after opening a door (30-240secs). With SIA limits disabled the minimum time can be set to 5 secs. <b>NOTE:</b> For UL Commercial Burg (UL2610) maximum entry delay should not exceed 60s. For EN Grade 2 it shall not exceed 30 sec.
Normal Exit Delay	60 Secs	How much time users have to exit the location before the panel arms itself (30-254secs). With SIA limits disabled the minimum time can be set to 5 secs. Door/Window group 10 follows the "Normal Exit Delay" <b>NOTE:</b> For UL Commercial Burg (UL2610) maximum exit delay should not exceed 60s. For EN Grade 2 the maximum exit delay should not exceed 30s.
Long Entry Delay	100 Secs	A second separate entry delay that can be used on a sensor needing more time when tripped (45-240secs). With SIA limits disabled the minimum time can be set to 5 secs. <b>NOTE:</b> Not for use with EN Grade 2
Long Exit Delay	120 Secs	A second separate exit delay that can be used on a sensor needing more time when tripped (45-254secs). With SIA limits disabled the minimum time can be set to 5 secs. Door/Window group 12 follows the "Long Exit Delay". <b>NOTE:</b> Not for use with EN Grade 2

## CAMERA SETTINGS

### Camera Settings

Enable/Disable Disarm photos and Alarm photos. Secure images requiring a code to either view or delete.

Setting	Default	Description
Secure Delete Images	Enabled	When enabled, a code is required to delete disarm and alarm photos
Panel Camera	Enabled	When disabled, all Panel Camera related functions are turned off, including: Disarm Photos, Alarm Photos, Alarm Videos and Settings Photos. Additionally the Panel Camera Page is also removed
Disarm Photos	Enabled	When enabled, the built-in camera will take a single photograph when a user disarms the panel. When disabled, the panel will not capture images upon disarm
Alarm Photos	Enabled	When enabled, the built-in camera will take a single photograph during an alarm event
Alarm Videos	Enabled	When an alarm is triggered the panel will record a video clip for 4 mins from it's built in 8mp panel camera

# SECURITY SENSORS

## SECURITY SENSORS

### Security Sensors

Add, edit or delete up to 128 security RF or life safety devices.

### Auto Learn Sensor

Pair sensors quickly by tripping or tampering and then editing the information

### Add Sensor

Pair sensors manually by typing in a DL code or Serial number

### Edit Sensor

Make changes to existing sensors

### Delete Sensor

Remove a sensor

### Sensor Status

Monitor sensor status in realtime

### Sensor Group

Quick reference to all sensor groups and their actions

### Panel Motion Settings

Adjust Panel Motion sensitivity and masking areas

### Remove All PowerG Sensors

Delete all PowerG sensors from the Panel

### Remove All Zigbee Sensors

Delete all Zigbee sensors from the Panel

### PowerG Output Rules

Configure PGMs when using the PGxWLSHW8

SECURITY SENSORS

## AUTO LEARN SENSOR

**Note:** SRF433 is not for EN Grade 2 Installations. SRF319 and SRF345 are not for UKCA or CE/EN Grade 2 Installations

1. Select “Auto Learn Sensor”

2. Open/Close or Tamper a sensor to enroll. For PowerG contacts, hold the “enroll” button until the yellow LED flashes.

3. Panel will chime and display the sensor’s DL code. Select OK to confirm.

4. Configure **Partition Name**, **Sensor Type**, **Sensor Group**, **Sensor Name**, **Chime Type** and **Voice Prompts** with the smart filtering drop down lists.

5. Select “Add New” to complete and move to the next sensor.

### NOTE:

When enrolling an “S-Line” sensor, the panel will auto detect that it’s encrypted and change the “Source” field to S-Line.

IQ Panel 4 only: When enrolling a sensor of a different frequency (345MHz, 433MHz, PowerG) the Source field will change to accommodate the incoming signal type.

When a sensor with the frequency 345 is used, you will be given an additional field to specify the Loop #.

## ADD SENSOR

Sensor DL ID	<input type="text" value="Enter Sensor DL ID"/>
Partition Name	<input type="text" value="partition1"/>
Sensor Type	<input type="text" value="Door/Window"/>
Sensor Group	<input type="text" value="10-Entry-Exit-Normal Delay"/>
Sensor Name	<input type="text" value="Front Door"/>
Chime Type	<input type="text" value="High Wire"/>
Voice Prompts	<input type="text" value="On"/>
Source	<input type="text" value="SecurityRF-319"/>

ADD NEW

SCAN QR CODE

1. Select “**Add Sensor**” (NOTE: These same fields can be edited later from the “Edit Sensor” app)
2. Select the appropriate **Source** based on the frequency of device being manually learned in
3. Tap the field marked “**Sensor DL ID**” to open the keyboard. Enter the DL code or Sensor ID on the back of the device and touch “Done”
4. Use the drop down menu to select which **Partition** you would like the sensor to be added to (if enabled)
5. Choose **Sensor Type** from list
6. Indicate **Sensor Group** from list
7. Choose **Sensor Name** from the list or create a “Custom Name” using the built in keyboard with Custom Text to Speech.
8. Choose **Chime Type** from list
9. Indicate whether you want **Voice Prompts** on or off
10. Click “**Add New**” to save the information and complete the process.

## SCAN QR CODE

\*This feature is only used with Qolsys S-Line 319 Sensors that have compatible QR code labels on the box

Sensor DL ID	<input type="text" value="Enter Sensor DL ID"/>
Partition Name	<input type="text" value="partition1"/>
Sensor Type	<input type="text" value="Door/Window"/>
Sensor Group	<input type="text" value="10-Entry-Exit-Normal Delay"/>
Sensor Name	<input type="text" value="Front Door"/>
Chime Type	<input type="text" value="High Wire"/>
Voice Prompts	<input type="text" value="On"/>
Source	<input type="text" value="SecurityRF-319"/>

ADD NEW

SCAN QR CODE

1. Select “**Add Sensor**”

2. Tap the button marked “**Scan QR Code**” to open the camera. Hold the QR code label on the sensor box up to the camera to automatically scan the Sensor DL ID

3. Use the drop down menu to select which **Partition** you would like the sensor to be added to (if enabled)

4. Choose **Sensor Type** from list

5. Indicate **Sensor Group** from list

6. Choose **Sensor Name** from the list or create a “Custom Name” using the built in keyboard with Custom Text to Speech.

7. Choose **Chime Type** from list

8. Indicate whether you want **Voice Prompts** on or off

9. Click “**Add New**” to save the information and complete the process.

## PARTITION NAME

When Partitions are enabled (see Dealer/Installer Settings) you may then assign a sensor to a specific partition. This will allow independent control and arming of that partition without disrupting the main panel's master partition. You may create and use up to 4 partitions.

☀️ H 0° 16:58 📧 4

← 🛡️ 🔥 + 🏠

## SENSOR TYPE

When adding or editing security devices you can choose from the following sensor types:

- Door/Window
- Motion
- Glass Break
- Key Fob
- Keypad
- Auxiliary Pendant
- Smoke Detector
- CO Detector
- Hardwire Translator
- Wireless Translator
- Temperature
- Heat
- Water
- Shock Sensor
- Freeze
- Tilt
- Door Bell
- Smoke-M
- Door/Window-M
- Occupancy Sensor
- Siren
- High Temperature

The screenshot shows a mobile application interface for configuring a security sensor. At the top, there is a weather icon, temperature (H 0°, L 0°), time (16:58), and date (12/12/18). A notification icon with the number 4 is in the top right. The main form has the following fields:

- Sensor DL ID:** Enter Sensor DL ID
- Partition Name:** partition1
- Sensor Type:** A dropdown menu is open, showing options: Door/Window, Motion, Glass Break, and Key Fob. This field is highlighted with a green border.
- Sensor Group:** Motion
- Sensor Name:** Front Door
- Chime Type:** High Wire
- Voice Prompts:** On
- Source:** SecurityRF

At the bottom of the form, there is a 'SCAN QR CODE' button and a navigation bar with icons for back, shield, plus, and home.

Note: for UL/cUL, only UL/cUL listed devices shall be used: Door/Window contact: 60-362N-10-319.5, Motion Detector: 60-639-95R, Smoke Detector: IQ Smoke QS5110-840. For UL2610 installations use only UL listed PowerG devices.

## SENSOR GROUP

Sensor groups will change the behavior of the sensor. These are tied directly to your Sensor Type, displaying only what's relevant.

Touch the "Sensor Group" drop down to change.

A full list of Sensor Groups and descriptions can be found under "Sensor Groups" listed in the manual below.

The screenshot shows a mobile application interface for configuring a sensor. At the top, there is a weather icon, temperature (H 0°, L 0°), the time (16:58), and the date (12/12/18). A notification icon with the number 4 is in the top right. The main configuration area includes:

- Sensor DL ID:** Enter Sensor DL ID
- Partition Name:** partition1
- Sensor Type:** Door/Window
- Sensor Group:** A dropdown menu with options: 10-Entry-Exit-Normal Delay, 12-Entry-Exit-Long Delay, 13-Instant Perimeter D/W, and 14-Instant Interior Door. This dropdown is highlighted with a green box.
- Sensor Name:** Front Door
- Chime Type:** High Wire
- Voice Prompts:** On
- Source:** SecurityRF

A "SCAN QR CODE" button is located at the bottom right of the configuration area. The bottom navigation bar contains icons for back, shield, fire, plus, and home.

## SENSOR GROUPS

IQ Panel 4 supports PowerG along with ONE “legacy” frequency (319.5 MHz, 345 MHz, or 433 MHz) depending on which RF daughter card is pre-installed. Sensor Group numbers and behaviors remain the same across all frequencies. When pairing a 345 MHz sensor with the Panel, an additional option for “Loop” number will be shown. IQ Panel 4 also supports the use of Zigbee daughter card in conjunction with compatible Zigbee devices for UL/ULC Residential Fire and Burglary applications. **Note:** SRF433 is not for EN Grade 2 Installations. SRF319 and SRF345 are not for UKCA or CE/EN Grade 2 Installations

## DOOR/WINDOW

GROUP	NAME	SUPERVISED	SCENARIO
10	Entry-Exit- Normal Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm
12	Entry-Exit- Long Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm. This can be a separate delay from the “normal delay”
13	Instant Perimeter D/W	Y	Door or window that triggers an alarm <b>instantly</b> when system is armed
14	Instant Interior Door	Y	An interior sensor that triggers an alarm <b>instantly</b> while armed to both stay and away. Does not trip if an entry/exit sensor is tripped first

## DOOR/WINDOW

GROUP	NAME	SUPERVISED	SCENARIO
16	Away Instant- Follower Delay	Y	Interior door that <b>triggers alarm instantly</b> when system is armed to away mode only
25	Local Safety Sensor	Y	This sensor does <b>not</b> report or trigger an alarm. This is a <b>chime only</b> sensor when "Activity Monitoring" is active, regardless of panel status. Used for medicine cabinets, chemical storage etc
8	Reporting Safety Sensor	Y	This sensor reports to the central station and <b>triggers</b> an alarm when "Activity Monitoring" is active, regardless of panel status
9	Delayed Reporting Safety Sensor	Y	This sensor reports to the central station and triggers an alarm when "Activity Monitoring" is active, regardless of panel status. This sensor has an entry delay

\*345 MHz door/window sensors will have the option to change the "Loop" number to 1 or 2. This will allow the sensor to be programmed twice as 2 different zones.

\* Power G Door/Window contact PGx945, PGx309, PGx312 adds an additional drop down menu to determine the contact type, Reed Switch or Wired.

## MOTION

GROUP	NAME	SUPERVISED	SCENARIO
17	Away- Instant Motion	Y	Active only when armed to “Away”, and trips instantly when motion is detected. Does <b>not</b> trip if an entry/exit sensor is tripped first
15	Stay- Instant Motion	Y	Active in both “Stay” & “Away” modes, and trips instantly when motion is detected. Does <b>not</b> trip if an entry/exit sensor is tripped first
35	Stay- Delay Motion	Y	Active in both “Stay” & “Away” modes. Triggers an entry delay when motion is detected. Does <b>not</b> trip if an entry/exit sensor is tripped first
20	Away- Delay Motion	Y	Active when armed to “Away”. Triggers an entry delay when motion is detected. Does <b>not</b> trip if an entry/exit sensor is tripped first
25	Safety Motion	Y	This sensor does <b>not</b> report or trigger an alarm. This is a chime only sensor when “Activity Monitoring” is active, regardless of panel status. Used for medicine cabinets, storage, activity tracking, etc

## MOTION

GROUP	NAME	SUPERVISED	SCENARIO
43	Away- Instant, Stay-Delay Motion	Y	Active in both “Stay” & “Away” modes. During Away mode, trips instantly when motion is detected. Does <b>not</b> trip if an entry/exit sensor is tripped first. During Stay mode, triggers an entry delay when motion is detected.
44	Away- Instant Interior Motion	Y	Active only when armed to “Away”, and trips instantly when motion is detected. Does <b>not</b> follow entry/exit delay rules and is always instant.
45	Away- Stay- Instant Interior Motion	Y	Active in both “Stay” & “Away” modes. Trips instantly when motion is detected. Does <b>not</b> follow entry/exit delay rules and is always instant.

\*345 MHz motion sensors will have the option to change the “Loop” number to 1, 2 or 3. This will allow the sensor to be programmed twice as 2 different zones where supported by the device.

\*Power G Motion Detectors with Prefix 120, 122, 130, 140 and 142 offer additional functions such as High Traffic Shutdown and Sensitivity Level. Motions with prefix 123, 126, 127, 128 and 129 offer High Traffic Shutdown only as an additional function.

## GLASS BREAK

\*345 MHz glass break sensors can be programmed as “Loop” 1 only

GROUP	NAME	SUPERVISED	SCENARIO
13	Glass Break	Y	Active in both “Stay” and “Away” mode
17	Glass Break -Away Only	Y	Active in “Away” mode only

## KEY FOB

\*345 MHz Keyfobs will follow the IQ Panel’s Keyfob programming and functionality

GROUP	NAME	SUPERVISED	SCENARIO
1	Mobile Intrusion	N	<b>Worn or carried</b> , the button(s) is/are programmed to trigger a <b>police panic</b>
3	Mobile Silent	N	<b>Worn or carried</b> , the button(s) is/are programmed to trigger a <b>silent police panic</b>
4	Fixed Auxiliary	Y	Installed in a <b>fixed location</b> such as night stand, the button(s) is/are programmed to trigger an <b>Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
5	Fixed Silent Auxiliary	Y	Installed in a <b>fixed location</b> such as night stand, the button(s) is/are programmed to trigger a <b>silent Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.

## KEY FOB

\*345 MHz Keyfobs will follow the IQ Panel's Keyfob programming and functionality

GROUP	NAME	SUPERVISED	SCENARIO
6	Mobile Auxiliary	N	<b>Worn</b> as a wrist watch or pendant, the button(s) is/are programmed to trigger an <b>Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
7	Mobile Silent Auxiliary	N	<b>Worn</b> as a wrist watch or pendant, the button(s) is/are programmed to trigger a <b>silent Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.

## KEYPAD

GROUP	NAME	SUPERVISED	SCENARIO
0	Fixed Intrusion	Y	Installed in a <b>fixed location</b> , the keypad is programmed to trigger a <b>police panic</b> . <b>NOTE:</b> Hold-up functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
1	Mobile Intrusion	N	<b>Keypad can be mobile</b> and is programmed to trigger a <b>police panic</b>
2	Fixed Silent	Y	Installed in a <b>fixed location</b> , the keypad is programmed to trigger a <b>silent police panic</b>
3	Mobile Silent	N	Keypad can be mobile and is programmed to trigger a <b>silent police panic</b>

## KEYPAD

GROUP	NAME	SUPERVISED	SCENARIO
4	Fixed Auxiliary	Y	Installed in a <b>fixed location</b> such as night stand, the keypad is programmed to trigger an <b>Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
5	Fixed Silent Auxiliary	Y	Installed in a <b>fixed location</b> such as night stand, the keypad is programmed to trigger a <b>silent Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
6	Mobile Auxiliary	N	Keypad can be mobile and is programmed to trigger an <b>Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
7	Mobile Silent Auxiliary	N	Keypad can be mobile and is programmed to trigger a <b>silent Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.

## AUXILIARY PENDANT

\*345 MHz auxiliary pendants can be programmed as “Loop” 1 only

GROUP	NAME	SUPERVISED	SCENARIO
0	Fixed Intrusion	Y	Installed in a <b>fixed location</b> such as under a desk, the button(s) is/are programmed to trigger a <b>police panic</b>
1	Mobile Intrusion	N	Worn or carried, the button(s) is/are programmed to trigger a <b>police panic</b>
2	Fixed Silent	Y	Installed in a <b>fixed location</b> such as under a desk, the button(s) is/are programmed to trigger a <b>silent police panic</b>
3	Mobile Silent	N	<b>Worn or carried</b> , the button(s) is/are programmed to trigger a <b>silent police panic</b>
4	Fixed Auxiliary	Y	Installed in a <b>fixed location</b> such as night stand, the button(s) is/are programmed to trigger an auxiliary panic
5	Fixed Silent Auxiliary	Y	Installed in a <b>fixed location</b> such as night stand, the button(s) is/are programmed to trigger a <b>silent Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
6	Mobile Auxiliary	N	Worn as a wrist watch or pendant, the button(s) is/are programmed to trigger an <b>Auxiliary panic</b>
7	Mobile Silent Auxiliary	N	<b>Worn</b> as a wrist watch or pendant, the button(s) is/are programmed to trigger a <b>silent Auxiliary panic</b> . <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
25	Safety Auxiliary Pendant	N	Used for local alerts like a nurse call button. Will not report an alarm to the Central Station. <b>NOTE:</b> Medical functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.

\*345 MHz smoke sensors will have the option to change the “Loop” number to 1, 2 or 3. This will allow the sensor to be programmed twice as 2 different zones where supported by the device

## SMOKE DETECTOR/HEAT

GROUP	NAME	SUPERVISED	SCENARIO
26	Smoke-Heat	Y	Triggers an alarm when sensor detects smoke/rapid rise in heat

## SMOKE-M

GROUP	NAME	SUPERVISED	SCENARIO
26	Smoke-Heat	Y	Triggers an alarm when sensor detects smoke or a rapid rise of heat. Use <b>ONLY</b> with Qolsys multi-sensor smoke (QS5110-840)

## CO DETECTOR

\*345 MHz carbon monoxide sensors can be programmed as “Loop” 1 only

GROUP	NAME	SUPERVISED	SCENARIO
34	CO	Y	Triggers an alarm when sensor detects Carbon Monoxide

## HARDWIRE TRANSLATOR & WIRELESS TRANSLATOR

GROUP	NAME	SUPERVISED	SCENARIO
13	Takeover	Y	Triggers an alarm when sensor is tampered in "Stay" or "Away" mode

## TILT

\*345 MHz tilt sensors can be programmed as "Loop" 3 only

GROUP	NAME	SUPERVISED	SCENARIO
10	Entry-Exit- Normal Delay	Y	Triggers alarm after "normal delay" expires. Arms with both "Stay" and "Away"
12	Entry-Exit- Long Delay	Y	Triggers alarm after "long delay" expires. Arms with both "Stay" and "Away"
25	Garage Tilt- Safety Tilt	Y	This sensor group does <b>not</b> report or trigger an alarm. This is a chime only sensor when "Activity Monitoring" is active, regardless of panel status. Great for detached garage/shops. <b>NOTE:</b> Functionality in conjunction with garage door openers has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.

## WATER

\*345 MHz water sensors will have the option to change the “Loop” number to 1, 2 or 3. This will allow the sensor to be programmed twice as 2 different zones where supported by the device

GROUP	NAME	SUPERVISED	SCENARIO
38	Water Sensor	Y	Triggers an alarm when sensor detects presence of water. <b>NOTE:</b> flood sensor functionality has not been evaluated for UL/cUL, UKCA or CE/EN Grade 2.
25	Water Non-Reporting	Y	Used for local alerts. Will not report an alarm to the Central Station

**Please note:** When selecting “Water” you will see two additional options under “Sensor Sub-Type”: For IQ TempH2O (QS5500-PO1) & the IQ Flood (QS5516-840/QS5536-840) select “IQ Flood”; for all others, select “Other Flood”

## SHOCK SENSOR

\*345 MHz shock sensors will have the option to change the “Loop” number to 1 or 3. This will allow the sensor to be programmed twice as 2 different zones where supported by the device

GROUP	NAME	SUPERVISED	SCENARIO
13	Shock-Glass-Break	Y	Arms and trips shock sensors immediately when armed to both “Stay” and “Away”
17	Glass-Break-Away Only	Y	Arms and trips shock sensors immediately when armed only to “Away”

**Please note:** When selecting “Shock” you will see two additional options under “Sensor Sub-Type”: For IQ Shock select “IQ Shock”; for all others select “Other Shock”; \*Power G Shock Sensor with prefix 170 offers additional sensitivity level functions

## FREEZE

\*345 MHz temp sensors can be programmed as “Loop” 1 only

GROUP	NAME	SUPERVISED	SCENARIO
52	Freeze	Y	Triggers an alarm when sensor detects low temperatures. <b>NOTE:</b> temperature sensor functionality has not been evaluated by UL/cUL
25	Freeze Non-Reporting	Y	Used for local alerts. Will not report an alarm to the Central Station

**Please note:** When using the PGx905 with Group 52, Freeze, the Low threshold setting is set to 40°F (4°C) by default. The Low threshold can be customized between -22°F and 158°F (-40°C and 85°C).

## HIGH TEMPERATURE

GROUP	NAME	SUPERVISED	SCENARIO
53	Temp Reporting	Y	Triggers an alarm when sensor detects high temperatures. <b>NOTE:</b> temperature sensor functionality has not been evaluated by UL/cUL
25	Temp Non-Reporting	Y	Used for local alerts. Will not report an alarm to the Central Station

**Please note:** When using the PGx905 with Group 53, the High threshold setting is set to 100°F (38°C) by default. The High threshold can be customized between -22°F and 158°F (-40°C and 85°C).

## DOOR BELL

GROUP	NAME	SUPERVISED	SCENARIO
25	Local Safety Sensor	Y	This sensor does <b>not</b> report or trigger an alarm. This is a chime only sensor when "Activity Monitoring" is active, regardless of panel status. Great to automate lights, cameras and notifications etc

## SIREN

GROUP	NAME	SUPERVISED	SCENARIO
33	Siren	Y	Used for supervising Z-Wave sirens for wireless connectivity. Reports to the central station.
25	Local Safety Sensor	Y	Used for supervising Z-Wave sirens for wireless connectivity. Local supervision only. Does <b>NOT</b> report to the central station.

## DOOR/WINDOW-M (For use only with Multi-function Door/Window Sensors)

GROUP	NAME	SUPERVISED	SCENARIO
10	Entry-Exit- Normal Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm
12	Entry-Exit- Long Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm. This can be a separate delay from the "normal delay"
13	Instant Perimeter D/W	Y	Door or window that triggers alarm <b>instantly</b> when system is armed
14	Instant Interior Door	Y	An interior sensor that triggers an alarm <b>instantly</b> while armed to both stay and away. Does not trip if an entry/exit sensor is tripped first
16	Away Instant- Follower Delay	Y	Interior door that <b>triggers alarm instantly</b> when system is armed to away mode only

## DOOR/WINDOW-M (For use only with Multi-function Door/Window Sensors)

GROUP	NAME	SUPERVISED	SCENARIO
25	Local Safety Sensor	Y	This sensor does <b>not</b> report or trigger an alarm. This is a <b>chime only</b> sensor when "Activity Monitoring" is active, regardless of panel status. Used for medicine cabinets, chemical storage etc
8	Reporting Safety Sensor	Y	This sensor reports to the central station and <b>triggers</b> an alarm when "Activity Monitoring" is active, regardless of panel status
9	Delayed Reporting Safety Sensor	Y	This sensor reports to the central station and triggers an alarm when "Activity Monitoring" is active, regardless of panel status. This sensor has an entry delay

## OCCUPANCY SENSOR

GROUP	NAME	SUPERVISED	SCENARIO
25	Local Safety Sensor	Y	This sensor group is to be used for monitoring activity in the home. This group does not report

## TEMPERATURE

GROUP	NAME	SUPERVISED	SCENARIO
51	Temp Non Reporting	Y	Only for use with the PowerG Temp Sensor (PGx905). This sensor group does <b>not</b> report to the Central Station. Allows for actual temperature monitoring (thermometer) with customizable high/low threshold settings
52	Freeze	Y	Triggers an alarm when sensor detects low temperatures. <b>NOTE:</b> temperature sensor functionality has not been evaluated by UL/cUL
53	Temp Reporting	Y	Triggers an alarm when sensor detects high temperatures. <b>NOTE:</b> temperature sensor functionality has not been evaluated by UL/cUL

**Please note:** When using the PGx905 with Group 51, the High & Low threshold settings are set to 40°F and 100°F (4°C and 38°C) by default. When using Group 52, the Low threshold setting is set to 40°F (4°C) by default. When using Group 53, the High threshold setting is set to 100°F (38°C) by default. Thresholds can be customized between -22°F and 158°F (-40°C and 85°C).

## SENSOR NAME

The screenshot displays a configuration screen for a security sensor. At the top, there is a weather icon with 'H 0°' and 'L 0°', a clock showing '16:58' and the date '12/12/18', and a notification icon with a red '4'. Below this, the 'Sensor DL ID' field contains 'Enter Sensor DL ID', and the 'Sensor Name' field is highlighted with a green border. To the right of the 'Sensor Name' field is a scrollable list of preset names: 'Front Door', 'Custom Description', 'Front Window', 'Back Door', and 'Back Window'. Below the list are two buttons: 'ADD NEW' and 'SCAN QR CODE'. At the bottom, there is a navigation bar with icons for back, home, and other functions.

When you select the sensor name field you can choose from a variety of preset sensor names by scrolling up and down or create a custom description.

## SENSOR NAME: CUSTOM DESCRIPTION

When you select “Custom Description” as your sensor name the keyboard will appear. Type in the desired name (up to 56 characters) and click “Done.” The name will appear in the field below “Sensor Name.”

The screenshot displays the following configuration options:

- Sensor DL ID:** Enter Sensor D Front Door (with a keyboard overlay and a green box around the text)
- Partition Name:** partition1
- Sensor Type:** Door/Window Front Window
- Sensor Group:** 10-Entry-Exit-Normal delay Source
- Right-side dropdowns:** Front Door, High Wire, On, SecurityRF

## CHIME TYPE

The screenshot shows a mobile application interface for configuring a security sensor. At the top, there is a weather icon, temperature (H 0°, L 0°), the time (16:58), and the date (12/12/18). A notification icon with a red '4' is in the top right. The main configuration area includes:

- Sensor DL ID:** A text input field with the placeholder "Enter Sensor DL ID".
- Partition Name:** A dropdown menu currently showing "partition1".
- Sensor Type:** A dropdown menu currently showing "Door/Window".
- Sensor Group:** A dropdown menu currently showing "10-Entry-Exit-Normal Delay".
- Sensor Name:** A dropdown menu currently showing "Front Door".
- Chime Type:** A dropdown menu highlighted with a green box, showing a list of options: "None", "High Wire", "On The Hunt", "Door Bell", and "Heaven". A vertical double-headed arrow is positioned to the right of this list.
- Voice Prompts:** A field currently empty.
- Source:** A field currently empty.

At the bottom of the configuration area are two buttons: "ADD NEW" and "SCAN QR CODE". The bottom navigation bar contains icons for back, home, and other functions.

Because of the dynamic nature of the way the IQ Panel 4 pairs and understands each individual sensor, you can program each sensor to have a unique chime or even turn chiming off for that individual sensor. To customize your chime for a particular sensor touch the Chime Type drop down and choose from the list.

## VOICE PROMPTS

The screenshot shows a mobile application interface for configuring a security sensor. At the top, there is a weather icon, temperature (H 0°, L 0°), the time 16:58, and the date 12/12/18. A notification icon with a red circle containing the number 4 is in the top right. The main configuration area consists of several rows of labels and input fields:

- Sensor DL ID:** Enter Sensor DL ID
- Partition Name:** partition1
- Sensor Type:** Door/Window
- Sensor Group:** 10-Entry-Exit-Normal Delay
- Sensor Name:** Front Door
- Chime Type:** High Wire
- Voice Prompts:** On (This dropdown menu is highlighted with a green border)
- Source:** SecurityRF

At the bottom of the configuration area are two buttons: "ADD NEW" and "SCAN QR CODE". A navigation bar at the very bottom contains icons for back, shield, fire, plus, and home.

Voice prompts announce the sensor name when the sensor is opened or tripped.\*

For door/window sensors, voice prompts are defaulted to “On”. For most other sensors the default is “Off.” Touch the drop down menu to change.

Choose individually which sensors should have voice prompts ON or OFF

**\*NOTE:** “Activity Monitoring Sensors” will also audibly report when they have been closed.

## SOURCE

ADD NEW    SCAN QR CODE

Source indicates the sensor's incoming frequency when pairing to the IQ Panel 4.

The following options will be available depending on the pre-installed RF Daughter Card:

- PowerG
- SecurityRF
- SecurityRF-319
- S-Line
- SecurityRF-345
- 345RF 2G
- SecurityRF-433
- Zigbee

**NOTE:** PowerG modem radio cards are used also in UL/ULC listed Commercial burglary applications. SRF319, SRF433 (DSC Protocol), PowerG modem, Zigbee and SRF345 radio cards are used in UL/ULC listed Residential fire and burglary applications. SRF433 (AT&T Digital Life protocol) modem radio cards are used only in UL listed Residential fire and burglary applications. Zigbee and SRF433 are not for EN Grade 2, SRF319, SRF345 are not for UKCA or CE/EN Grade installations.

## EDIT SENSOR

### Edit Sensor

Edit sensors after they have already been learned in. All fields can be edited with the exception of the DL or Sensor ID.

NO	PTID	ID	SIGNAL SOURCE	TYPE	NAME	GROUP	EDIT
1	1	12BEA1	G	Motion	Upstairs Motion Detector	17-Away-Instant Motion	
2	1	12BEA2	G	Motion	Downstairs Motion Detector	17-Away-Instant Motion	
3	1	12BEA3	G	Door/Window	Front Door	10-Entry-Exit-Normal Delay	
4	1	12BEA4	G	Door/Window	Laundry Door	10-Entry-Exit-Normal Delay	
5	1	12BEA5	G	Door/Window	Back Door	13-Instant Perimeter DAW	

To make changes to a sensor, touch the “Pencil” icon next to the sensor that needs editing. Change desired fields and then touch “SAVE”.

## DELETE SENSOR

### Delete Sensor

Delete each sensor individually or choose to delete more than one at a time. This is useful when needing to replace a sensor all together instead of simply editing programmed information.

Select the sensor(s) from the list that are to be deleted and then touch “DELETE”

Verify that the action is correct and touch “OK” to confirm or “CANCEL” to quit the operation

## PANEL MOTION SETTINGS

### Panel Motion Settings

Control settings for the built-in Panel Motion Detector. Change the sensitivity threshold and mask off up to 4 customizable areas to prevent false triggers.

#### Masking:

Touching "ADD MASK" will give a drawable area (green) that is not taken in to account for motion pixelation change, then touch "SAVE MASK" to save. Up to 4 independent mask areas can be drawn.

#### Sensitivity Setting:

Touch "SETTING" to change the the Panel Motion sensitivity between Low (default), Medium and High. Use the Green to Red bar on the right side of the screen to determine trigger threshold.

# WI-FI DEVICES

## WI-FI DEVICES

### Wi-Fi Devices

View and remove Wi-fi devices associated with the panel as well as configure the Qolsys Access point.

### Wi-Fi

Scan and connect to a Wi-Fi network. This will ensure your panel can receive software updates and have a Dual Path connection.

### Access Point Settings

Configure the IQ Panel 4's built in router. Enable/Disable the router, broadcast or hide the SSID and change the SSID's password etc...

### Access Point Connected Devices

View connected device information such as IP, MAC address and for how long the device has been connected.

### IQ Remote Devices

Pair an IQ Remote Secondary Touchscreen to the panel whether it is connected to the customer's network or the panel's built in Access Point.

### 3rd Party Connections

Enable or disable 3rd party connections on the panel. This feature is used for specific 3rd party device integration

## FIND IT

DEVICES

WI-FI DEVICES

## CONNECTING TO WI-FI

To connect to a Wi-Fi network, follow the steps below:

Swipe down from the top menu bar and select settings.

Touch Advanced Settings (Installer Code)

Then touch “Wi-Fi”

Enable Wi-Fi if not already active

Available networks appear in a list. Touch the desired network and use the keyboard to type the password (if required)

### Activate WIFI

WI-FI DEVICES

## ACCESS POINT SETTINGS

### WI-FI Access Point:

Enable or Disable the Panel Access Point

### SSID:

Change the SSID Name. This is the name that other devices will use to connect to.

### DHCP IP Range:

Modify the DHCP IP Range for the access point. Default is 50.

### Change Password:

Change the password of the SSID to one of your choosing.

### Activate WPS:

Connect devices to the panel's built-in access point using WPS push button.

### Access Point Password:

Shows current password in use for the Panel Access Point

## ACCESS POINT CONNECTED DEVICES

NO	MAC ADDRESS	IP ADDRESS	CONNECTED TIME(MM:DD:HH:MM)	ACTIONS
1	00:02:d1:42:19:48	192.168.50.80	00:00:00:04	<input type="checkbox"/>

View the IP address, Mac address and connected duration of each Wi-Fi client connected to the panel's built in router.

Select "Actions" to then remove a device that has been associated with the panel.

You must remove saved network information from the device otherwise it will re-connect to the panel.

## IQ REMOTE DEVICES

### IQ Remote Devices

Pair up to 3 IQ Remote Secondary Touchscreens to the panel via the customer's network or the panel's built in access point.

**NOTE:** The IQ Remote will automatically pair as Sensor Type “Keypad” and will appear on the zone list in the order in which it is paired. Sensor Groups 0, 1 & 2 are available options for this Sensor Type.

1. Connect the IQ Remote to the panel's access point or to the same Wi-Fi network the panel is connected to. **NOTE:** QW9102 & QW9103 IQ Remotes only support 2.4 GHz networks. QW9104 IQ Remotes support both 2.4 GHz and 5 GHz.
2. Prior to pairing the IQ Remote to the panel you can Test the connection by select TEST on the panel and the remote.
3. Select “Pair” on the Panel and then Pair on the IQ Remote to begin during this process the remote will also download and update to the current software version and reboot.
4. The remote device will pair to the panel and will show that it is active on the list. You can then edit (device name and sensor group), ping, delete or rediscover the device if necessary

## 3RD PARTY CONNECTIONS

Note: Not authorized for EN Grade 2 installations

### 3rd Party Connections

Enable or disable 3rd party connections on the panel. This feature is used for specific 3rd party device integration

Check the “Control4” box to enable 3rd Party Connections. This will cause the panel to reboot in order to apply the change. Once enabled a secure token can be generated in order to sync with Control4 integration.

Remote Access, Home Accessories and Savant are reserved for future use.

# Z-WAVE DEVICES

## Z-WAVE DEVICES

Note: Not authorized for EN Grade 2 installations

### Z-Wave Devices

Add, Edit, Clear and Remove Z-Wave Devices. You can also View/Edit associations as well as access Z-Wave Settings.

#### Add Device (Inclusion)

Add new devices to the Z-Wave network

#### Edit Device

Make changes to existing devices

#### Clear Device (Exclusion)

Removes a Z-Wave device from its previous network. Also deletes a device from the IQ Panel 4 if currently paired.

#### Delete Failed Device

Remove a failed Z-Wave device from the IQ Panel 4's memory

#### Remove All Devices (Factory Default Reset)

If this controller is the primary controller for your network, resetting it will result in the nodes in your network being orphaned and it will be necessary after the reset to exclude and re-include all of the nodes in the network. If this controller is being used as a secondary controller in the network, use this procedure to reset this controller only in the event that the network primary controller is missing or otherwise inoperable.

#### View/Edit Associations

Manually change Z-Wave associations for specific devices.

#### Z-Wave Settings

Configure device limits and other Z-Wave settings.

#### SmartStart

Enter the device's DSK or simply scan the QR Code.

#### Provisioning List

Devices added via SmartStart will show their progress of being included into the network.

## ADD DEVICE

1. Select “Add Device”

2. Touch “Include”

3. Press the “Pair” or “Learn” button on the device when the message appears. *(see individual device documentation for instructions on button location)*

4. Adjust the device name by touching and making the appropriate selections.

5. Select “Automation” to enable simple light rules.

- **Night:** Turns light on at 7pm and off at 6am
- **Evening:** Turns light on at 7pm and off at 11pm
- **Front Door:** Turns light on for 15mins when Front Door opens (must have a sensor with the default quick name “Front Door” added in the panel).

6. Click “Add” to save the information and complete the process. (Adjustments can be made later from “Edit Device” icon)

S2 is a new Z-Wave Security Protocol. When an S2 node is attempting to be included it will request S2 security keys. These are based on the level of S2 security that the end device requires. These keys can be Unauthenticated, Authenticated or Access. These keys can be manually granted by selecting the appropriate option.

ENTER CODE (1111, 2222)

INSTALLATION

DEVICES

Z-Wave DEVICES

ADD DEVICE

## CLEAR DEVICE

Clears Z-Wave device from a network, whether it was enrolled with another controller previously or the IQ Panel 4. Also deletes a device from the IQ Panel 4 if currently paired.

Touch  
"Clear Device"

Panel will start sending a  
"Clear" signal

Press  
"Pair" or "Learn"  
button on device\*

Panel returns to  
Z-Wave Device  
menu when  
complete

**NOTE:** Each Z-Wave device is different, and not all devices have a hard button to pair or learn. Refer to your device's installation manual for specifics on pairing or learning.

## DELETE FAILED DEVICE

Deletes Z-Wave device from the panel. Before adding the device to another network see instructions on how to “Exclude” a Z-Wave device. Only allows a Node ID to be deleted if it has failed and is no longer communicating.

Touch  
“Delete Failed  
Device From  
Panel”

ID	TYPE	NAME	
<input type="checkbox"/>	2	Light	Light
<input type="checkbox"/>	3	Light	Bedroom Light
<input type="checkbox"/>	4	Door Lock	Front Door
<input type="checkbox"/>	5	Thermostat	Thermostat

Check the boxes next to the device(s) you want to delete

Touch “Delete”

## REMOVE ALL DEVICES

Deletes all Z-Wave devices from the panel and resets the panel's Z-Wave controller.

Touching "Remove All Devices" brings a confirmation pop-up asking you to confirm your decision to remove all devices.

If this controller is the primary controller for your network, resetting it will result in the nodes in your network being orphaned and it will be necessary after the reset to exclude and re-include all of the nodes in the network. This procedure will send a "Device Reset Locally" to all Z-Wave devices in the IQ Panel 4's Lifeline Group (Group 1).

## VIEW/EDIT ASSOCIATIONS

Manually change Z-Wave associations for specific devices.

Id	Name	Association
3	Bedroom Light	<a href="#">View</a>
4	Downstairs Light	
5	Hallway Light	
6	Upstairs Thermostat	
7	Downstairs Thermostat	

1. Select the Z-Wave device you would like to associate with another by touching "View"

2. Select "Edit"

	Id	Type	Name
<input type="checkbox"/>	1	Panel	Panel
<input type="checkbox"/>	2	Light	Family Room Light
<input type="checkbox"/>	4	Light	Downstairs Light
<input type="checkbox"/>	5	Light	Hallway Light
<input type="checkbox"/>	6	Thermostat	Upstairs Thermostat
<input type="checkbox"/>	7	Thermostat	Downstairs Thermostat

[Save](#)

3. "Check" the boxes next to each device that you would like to associate with. Then select "Save"

Note: The IQ Panel 4 supports Lifeline in Group 1 to send out Device Reset Locally when it has been associated to another Z-Wave Plus device. This is triggered when "REMOVE ALL DEVICES" is used

## Z-WAVE SETTINGS

Z-Wave Settings allow an installer to set a maximum number of Z-Wave devices allowed on the IQ Panel 4 in all categories and to control other Z-Wave settings.

Device	Default	Maximum Number Supported
Thermostats	40	Maximum number of supported Thermostats is 40
Lights	80	Max number of supported Z-Wave light modules is 80
Door Locks	20	Maximum number of supported Z-Wave Door Locks is 20
Other Z-Wave Devices	21	Maximum number of misc Z-Wave devices is 21
Garage Doors	6	Maximum number of Garage Doors is 6
Allow Master Code Z-Wave Settings	Disabled	Allow Master User Code to access Z-Wave Settings
Allow Master Code Z-Wave Management	Disabled	Allow Master User Code to access Z-Wave Devices (Add, Edit, Clear, Delete Failed Device, Remove All Devices & View/Edit Associations)

**NOTE:** This feature has not been evaluated by UL/cUL. This is a supplementary functionality that will not interfere with the minimum mandatory operation of the life safety and burglary protection of the alarm system control unit. UL Note: Additional Z-Wave devices other than what has been indicated as maximum limits have not been evaluated by UL/cUL.

## Z-WAVE SETTINGS

Setting	Default	Description
Access to Automation	Enabled	When <b>enabled</b> it allows the ability to apply simple automated actions to lights and switches directly from the panel
Z-Wave	Enabled	Activate or deactivate the Z-Wave radio. Please use this procedure only when the controller (panel) is missing or inoperable
Zwave Frequency Region	Varies by Region	Sets automatically based on install region and Z-Wave hardware installed in the panel or manually choose between United States, European Union, Australia/New Zealand, Hong Kong, Malaysia, India, Israel, Russia, China, Japan or Korea.
Advanced Z-Wave Settings	Disabled	When Advanced Z-Wave Settings is <b>enabled</b> the following new icons will appear on the Z-Wave Devices page: <ul style="list-style-type: none"> <li>- <b>Replace Failed Node:</b> Allows a node that has failed to be replaced with a new device using the same node ID</li> <li>- <b>Add/Remove Controller:</b> This icon acts like an “Add/Remove” button when pairing the IQ Panel into another network</li> </ul>

## SMARTSTART

1. Select "SmartStart"

2. Touch "Include"

3. Scan the Box or Device's QR code or manually enter the DSK code and select Add DSK.

4. Adjust the device name by touching and making the appropriate selections.

5. Select "Automation" to enable simple light rules.

- **Night:** Turns light on at 7pm and off at 6am
- **Evening:** Turns light on at 7pm and off at 11pm
- **Front Door:** Turns light on for 15mins when Front Door opens (must have a sensor with the default quick name "Front Door" added in the panel).

6. Click "Add" to save the information and complete the process. (Adjustments can be made later from "Edit Device" icon)

## PROVISIONING LIST

### Provisioning List

Devices added via SmartStart will show up in the provision list. This list will show the network status of those devices. Once a device reaches the “Included” state on the panel, it can no longer be deleted using the trash can method and must follow standard clearing process.

DSK	TYPE	NAME	NETWORK STATUS
49036	Light	Light	Not in network

### NETWORK STATUS:

**Not in network:** When a device has been paired but has not yet been plugged in it will show Not in Network. These devices can also be deleted using the trash can.

**Started:** Once the device has been paired and then plugged in, it will start the inclusion process with the panel and run in the back ground.

**Included:** When a device has completed the inclusion process it will then show as “included” in the provisioning list and at that point the panel’s UI will reflect the included devices.

# BLUETOOTH DEVICES

## BLUETOOTH DEVICES

### Bluetooth Devices

Add, Edit, Delete and Configure a Bluetooth Device. Bluetooth disarm supported via a mobile device.

### Add Phone

Pair up to 5 mobile Bluetooth devices.

### Edit Device

Make changes to existing Bluetooth devices.

### Delete Device

Delete a paired Bluetooth device

### Remove All Devices

Removes all paired Bluetooth devices at once.

### Settings

Toggle Bluetooth on/off, adjust Bluetooth disarm settings and change Bluetooth disarm timeout (1,5,10,20 & 30mins).

BLUETOOTH DEVICES

## ADD PHONE

1. Select “Add Phone” 
2. Open the Bluetooth page on your mobile device. The panel will search for all available and in range Bluetooth devices.
3. Select the correct device from the list on the panel and ensure the pairing code matches that on your mobile device.
4. Touch “Pair” on the panel first, and then on your mobile device.
5. Choose whether to allow disarming or not, and select the Partition to be disarmed (if Partitions are enabled).
6. Your mobile device will now show under the “Paired Devices” list on the panel.

**NOTE:** Your phone may show the IQ Panel as “Not Connected”. This is normal

## EDIT DEVICE

NO	MAC	NAME	EDIT
9	D4:F4:6F:27:35:57	Blakeney's iphone 6	
7	D0:03:4B:C0:FA:EB	Kevin Woodworth's iPhone	

1. Select the pencil next to the device you would like to edit.

2. Select whether or not you would like to allow a device to disarm the panel when in proximity.

3. Select which Partition you would like the device to disarm.

MAC

Name Kevin Woodworth's IP

Disarming Allow Disarming / Disable Disarming

Partition Access

- PARTITION1
- PARTITION2
- PARTITION3
- PARTITION4

SAVE

Note: This option is only available when "Partitions" are enabled. A device can only be assigned to one Partition at a time.

## DELETE DEVICE

1. Select the check box next to the device you would like to delete.

2. Select "Delete" at the bottom of the page.

3. Select "OK" to confirm and delete the device.

## REMOVE ALL DEVICES

To delete and remove all enrolled Bluetooth devices at once, select “Remove All Devices”.

Next select “OK” to confirm you would like to delete.

## SETTINGS

### BLUETOOTH:

Select or un-select this box to enable or disable the Bluetooth radio.

### BLUETOOTH DISARM:

Select or un-select this box to enable or disable the ability to disarm the panel via Bluetooth. To change this on an individual level you must edit the specific device.

### BLUETOOTH DISARM TIMEOUT:

Change the time in which the panel must wait after it's been armed to away before it allows a Bluetooth device to disarm it. **Default 10 min**  
Select from 1, 5, 10, 20 or 30 minute disarm timeout

# SYSTEM TESTS

## SYSTEM TESTS

### System Tests

There are many different tests you can perform to ensure the system is working properly.

### Wi-Fi Test

Test the panel's connection to the wireless (Wi-Fi) network

### Sensor Test

Shows actual dBm signal strength of each sensor and graphs sensor events against the ambient noise floor of the environment

### Cellular Test

Test the panel's connection to the cellular network and Alarm.com

### Z-Wave Tests

Test communication between devices and the panel. Rediscover network, counters, neighbor info, diagnostics & advanced diagnostics

### PowerG Test

Ping and receive signal strength from a PowerG sensor.

-  WI-FI TEST

## SENSOR TEST

### Sensor Test

Shows actual dBm signal strength of each sensor and graphs sensor events against the ambient noise floor of the environment. Also displays the traditional packet count method.

ZONE	NAME	AVERAGE DBM	LAST EVENT RESULTS (DBM) (PACKETS)		
1	Back Window	Strong (-43)	Strong (-47)	Perfect (16)	
2	Front Window	Strong (-31)	Strong (-33)	Perfect (8)	
3	Back Door	Good (-55)	Good (-55)	Excellent (7)	

Refer to page 99 for the sensor packet results table.

The Advanced Sensor Test shows a summary page of each sensor paired to the panel along with the average dBm level, the last event's dBm level and how many packets were received from the sensor.

Select the graph icon to the right of each sensor to view an individual sensor's graphed signal strength in real time.

## FIND IT

SETTINGS

ADVANCED SETTINGS

ENTER CODE (1111, 2222)

SYSTEM TESTS

SENSOR TEST

**NOTE:** For UL/cUL, perform a placement test first for all wireless initiating devices. The acceptable result shall be "Good".

## SENSOR TEST

### Noise Floor

From the Sensor Test page select the “Settings” cog to view the “Real Time Noise Floor”. The noise floor represents the dBm threshold at which the panel can no longer sense signals from sensors.

ZONE	NAME	AVERAGE DBM	LATEST RESULTS (DBM) (PACKETS)	Settings
1	Versa	Strong (-58)	Strong (-61)	Clear All Sensor Data Real Time Noise Floor
2	Flow	Strong (-62)	Strong (-67)	
4	Front Door	Strong (-51)	Strong (-59)	

Lower dBm levels mean there is less noise or interference on the sensor’s specific operating band or frequency.

## FIND IT

- SETTINGS
- ADVANCED SETTINGS
- ENTER CODE (1111, 2222)
- SYSTEM TESTS
- SENSOR TEST

**NOTE:** Manufacturer recommended signal to noise ratio is min 7dB

## SENSOR TEST

- Colored points on the graph represent each state change or supervisory signal transmitted from a sensor to the panel. Points are colored based on frequency.
- The **YELLOW** line represents a dBm level where signal strength is “Poor” and potential RF failures could occur. This line dynamically adjusts to 12 dBm above the ambient RF noise floor in the environment.
- The **RED** line represents a dBm level where signal strength is “Critical” and RF failures are likely. This line dynamically adjusts to 6 dBm above the ambient RF noise floor in the environment.

### TROUBLESHOOTING:

If a sensor falls below the yellow line, try changing its orientation (vertical/horizontal), move the sensor to a different part of the door/window or adjust the panel location.

Then re-test to see if the result improved.

PHOTO FRAME

## PHOTO FRAME SETTINGS

## FIND IT

Item	Default	Description
Duration	1 minute	How long each image will show before transitioning to the next image in the library (1, 2, or 5 minutes)
Effect	Dissolve	Transition effect used between each image (fade to black, dissolve)
Shuffle	Enabled	Display pictures in random or sequential order
Display Type	Photo Frame	Choose what to display on the screen when the panel is not in use. (Off, Photo Frame and Weather Clock)
Photo Frame Start Time	10 minutes	Choose the amount of time to wait after the last touch before starting the selected display type. (1, 5, 10, 15, 20, 25, or 30 minutes)
Nighttime Mode Start Time	11:00 PM	Determines the time when the display, voices or chimes shutdown completely. (Use this feature to turn off the LCD, voices and/or chimes at night)
Nighttime Mode End Time	6:00 AM	Determines the time when the display, voices or chimes "wake up" after sleeping. (Use this feature to turn the LCD, voices and/or chimes back on in the morning)
Nighttime Mode Settings	Display	Choose what the Nighttime Mode Start/End times have the ability to control (Display, Voices and/or Chimes)

# **MAINTENANCE**

## UPGRADE SOFTWARE

### Upgrade Software

Upgrade the panel's software version using Wi-Fi.

Setting	Description
Upgrade Using Network	Search the network for updates and install new software <b>NOTE:</b> For UL/cUL or EN Grade 2 installations remote software uploading is not allowed
Upgrade Using Access Point	Connect to the Panels' built-in Access Point to install new software
Patch Tag	A code corresponding to a specific software update on the server
Automatic Background Check and Download	Allows the panel to check for new software in the background and download it to local storage so that it can be applied at a later date. Default <b>Enabled</b>
Automatic Check Interval	Determines interval the IQ Panel 4 will look for software update. Available options are Every Night, Once a Week, Once a Month. Default <b>Once a Week</b>

## FIND IT

**NOTE:** Proper maintenance requires prompt administration of any software updates

## UPGRADE SOFTWARE USING WI-FI

Keeping your panel up to date is essential in ensuring it receives the newest features and is free from bugs.

To perform a software update using Wi-Fi follow the steps below:

- 1- Ensure your panel is connected to Wi-Fi and has an internet connection.
- 2- From the drop down menu select "Settings" then "Advanced Settings". (Installer/Dealer Code)
- 3- Touch "Upgrade Software"
- 4- Touch "Upgrade Using Network" The IQ Panel 4 will check for the latest software update. If your panel is up to date you will see a message confirming that you have the most recent software version.
- 5- If a software update IS available the panel will automatically begin downloading it.
- 6- Once the download is complete a pop up message will appear informing you that in order to install the software you must restart the panel. Touch "OK." Your panel will install the update and automatically restart.

## FIND IT

**NOTE:** For UL/cUL or EN Grade 2 installations the remote software feature shall not be used and the panel shall not be setup to remotely upgrade.

## UPGRADE SOFTWARE USING ACCESS POINT

Most updates are downloaded over Wi-Fi, but in the event that Wi-Fi is not present at the installation site, a Panel can be updated with files transferred from a local device (phone, tablet, computer, etc) via the built-in Panel Access Point.

To perform a software update using the Panel Access Point follow the steps below:

- 1- Download the needed software update files from the Dealer Portal to your device (phone, tablet, computer).
- 2- Go to Settings/Advanced Settings/Upgrade Software then touch “Upgrade Using Access Point”.
- 3- Scan the QR Code with your phone camera or manually connect to the Panel AP with the SSID and Password shown on the screen.
- 4- Press “Start” to begin the local server session, then from your device scan the second QR code or navigate to the “https” site shown on the Panel screen.
- 5- Follow the prompts on your device screen to select the correct files and transfer them to the Panel.

## FIND IT

**NOTE:** For UL/cUL or EN Grade 2 installations the remote software feature shall not be used and the panel shall not be setup to remotely upgrade.

## AUTOMATIC BACKGROUND CHECK AND DOWNLOAD

Turning on Automatic Background Check & Download enables the panel to check for a new software version based on the Automatic Check Interval (default is Once a Week).

From the drop down menu select "Settings"

"Advanced Settings": (Installer/Dealer Code)

Touch "Upgrade Software"

Make sure the "Automatic Background Check and Download" button is checked.

Change update interval by selecting "Automatic Check Interval"

## BATTERY REPLACEMENT

**NOTE:** This device and Lithium Battery shall be recycled and disposed of in accordance with your country (i.e. US, Canada, etc) and Laws including UK and European Directives and any other National and Local Regulations and Laws

1. **Power down panel:** Go to Settings/Advanced Settings and enter the Installer/Dealer/Master code, then select “Power Down”
2. **Unplug Battery Connector:** Once the panel is powered down, unplug 4 pin battery connector from the board.
3. **Remove Battery:** Pull up on the edge of the battery with your finger to release it from the plastic hold down.
4. **Install New Battery:** Press the battery into place. Route the cable between the battery and the daughter cards. Plug the 4 pin connector back in and power the panel back up.

**CAUTION:**

Do **NOT** use a screwdriver or anything sharp that could puncture the battery.

Do **NOT** pull on the battery cable to try and remove battery.

## BATTERY REPLACEMENT

**WARNING:** The battery used in this device may present a risk of fire or chemical burn if mistreated. Do not disassemble, heat above 60°C, or incinerate. Replace battery with Icon Energy Systems (Shenzhen) Co Ltd, Model IANO34NA or Ningbo Veken Battery Co. Ltd., Model VT27 only. Use of another battery may present a risk of fire or explosion.”

**WARNING:** Dispose of used battery promptly. Keep away from children. Do not disassemble, do not crush and do not expose of in Fire. Do not leave battery in extremely low air pressure.

# IMPORTANT

Important warning and information can be found on exterior back of the panel.

## UL/cUL RESIDENTIAL FIRE & BURGLARY INSTALLATIONS

This product has been tested and found in compliance with the following standards: UL1023 Household Burglar-Alarm System Units, UL985 Household Fire Warning System Units, ULC-S545 Residential Fire Warning Systems Control Units and ULC-S304 Security Level I Control Units, Accessories and Receiving Equipment for Intrusion Alarm Systems. For ULC Installations refer to the Standard for the Installation of Residential Fire Warning Systems, CAN/ULC-S540:

- Use only the compatible power supply referenced in this Installation Manual. 24 h standby power must be provided for fire applications and 4h for burglary only applications (AC trouble must be transmitted to SRC within 60 minutes).
- Priority of signals on the Panel is set as Fire, CO, Burg, Panic, Aux and then Flood.
- Use at least one compatible listed Smoke Detector for Fire Installations.
- The entry delay shall not exceed 45 sec (UL) and 180 sec (ULC Security Level 1).
- The exit delay shall not exceed 120 seconds (UL).
- The control panel supports the Temporal 3 pattern for fire alarm notification
- Test transmission cycle shall be set for 7 days transmission for Residential Fire applications, or 30 days for Residential Burglary only applications.
- If Wireless Repeater is required to be employed with a RF Smoke Detectors or CO Detectors, two repeaters must be installed to cover EACH Smoke Detector and/or EACH CO detector.

## UL/cUL RESIDENTIAL FIRE & BURGLARY INSTALLATIONS

**Note:** For ULC Residential Fire and Burglary (ULC-S304 Level I) installations set for daily test transmission, Wireless Supervision window shall be set to 4 hours for UL/ULC Residential Fire Installations. Wireless Supervision window shall be set to 24 hours for Residential Burglary Installations only. RF Jam detection shall be enabled.

For UL 985 6th Ed. Compliant installations using also the Wi-Fi connection, ensure Power for network equipment such as hubs, switches, routers, servers, modems, etc., is backed up or powered by an uninterruptible power supply (UPS), standby battery or the control unit, capable of facilitating 24 h standby

**Note:** For UL residential fire and burglary applications, it is required to use UL listed compatible siren models PG9901 or PG9911 to provide mandatory local notifications for fire and burglary alarms. The integral sounder is considered for supplementary use only. A maximum of two daughter radio cards (PowerG, SRF319, SRF345, SRF433 [DSC or AT&T], and Zigbee) shall be used in the available slots.

**Note:** SRF345, SRF433 and SRF433 AT&T cards along with the compatible devices are UL/cUL listed only for use in residential fire and burglary applications (ULC-S304 Security Level I).

## UL/ULC COMMERCIAL BURGLARY INSTALLATIONS

This product has been tested and found in compliance with the following standards: UL2610 Central Station Burglar-Alarm Units and ULC-S304 Control Units, Accessories and Receiving Equipment for Intrusion Alarm Systems, Security Levels I-II.

The subscriber control unit shall provide for the connection of protective wiring, conductors, and attachments in accordance with the Standard for Installation and Classification of Burglar and Holdup Alarm Systems, UL 681 in USA and in accordance with ULC-S301, CSA C22.1, Canadian Electrical Code, Part I, Safety Standard for Electrical Installations and ULC-S302 Standard for the Installation, Inspection and Testing of Intrusion Alarm Systems, in Canada.

**Note:** The product is not intended for installation outdoors or outside the protected premises.

This product is UL/ULC listed under the following categories: AMCE/AMCX7 Central Stations Alarm Units, UTOU/UTOU7 Control Units and Accessories, Household System Type NBSX/NBSX7 Household Burglar Alarm System Units. Zigbee card shall not be installed. For further information on this product's listings please also refer to the official listing guides published at the UL website ([www.ul.com](http://www.ul.com)) under Online Directory Section.

**Programming:**

The notes in the Installation Manual describing the system configurations for UL/uLC listed installations shall be implemented. RF Jam detection shall be enabled. Panel Siren is for supplementary use.

Use only PowerG sensors listed in "Supported PowerG Sensors" of this installer manual for UL/ULC Commercial Burglary installations. Require valid user code to arm this system must be enabled.

## UL/ULC COMMERCIAL BURGLARY INSTALLATIONS continued...

UL2610 Central Station with Standard or Encrypted Line Security Service and ULC-S304 Security Level I-II/A3 Active communication channel:

- The installation must use the integral cellular communicator, which sends events over Cellular Data Network to the compatible Sur-Gard System I/II/III/IV/5 receiver.
- The communication path supervision window is set to 180s with 90s heartbeat and the compromise detection takes place within 3 minutes. The panel is using encrypted line security AES256. NIST certificate A1554.
- Wireless Supervision window shall be enabled and set to 4 hours
- Open/Closing acknowledgment shall be enabled
- For ULC-S304 compliant installations using also the Wi-Fi connection, ensure Power for network equipment such as hubs, switches, routers, servers, modems, etc., is backed up or powered by an uninterruptible power supply (UPS), standby battery or the control unit, capable of facilitating 24 h standby.
- The entry delay shall not exceed 60s (UL) and 60s (ULC Security Level II).
- The exit delay shall not exceed 60s (UL) and 45s (ULC Security Level II).

Note: For UL certified Commercial Burglary Central Station applications the IQ Panel 4 provides an acknowledgment signal to the user interface to confirm that a normal closing signal has been received once the system has been armed. The device causes an audible and visual indication, when it receives the acknowledgment signal transmitted from the monitoring station compatible receiver: "Panel - Arming Response from Central Station is Acknowledged"

## UL/ULC COMMERCIAL BURGLARY INSTALLATIONS continued...

### Protection of the Control Unit:

The local control unit and the local power supply must be protected in one of the following ways:

- The control unit and audible alarm device must be in a protected area which is armed 24 hours a day.
- Each partition must arm the area protecting the control unit and the audible alarm device power supply. This may require duplicate protection armed by each partition. Access to this protected area, without causing an alarm, will require that all partitions be disarmed.
- In all cases described above, the protected area for the control unit must be programmed as not-bypassable

For installations employing packet switched (network) communications such as Cellular/Wi-Fi the following recommendations shall be followed:

- Select the Internet Service Providers that have redundant servers/systems and Back-up power.
- Routers shall have Firewalls enabled and methods to identify and protect against “Denial of Service” attacks (i.e. via “spoofing”).
- For UL Commercial Burglary applications the loss of communication with the monitoring station shall be treated as an alarm condition by monitoring station personnel when the burglar alarm system is in the armed state, and as a trouble condition while the system is disarmed. Packet switched data network (PSDN) interface equipment, manufactured by other than the burglar alarm equipment manufacturer, that is not provided with the burglar alarm system and/or not required for the processing of the signals shall be evaluated to the applicable requirements of the Standard for Information Technology Equipment - Safety - Part 1: General Requirements, UL 60950-1, or the Standard for Audio/Video, Information and Communication Technology Equipment - Part 1: Safety Requirements, UL 62368-1, as communication equipment. Any network interface device which adds value or manipulates the original data packet such as changing transmission formats, adding encryption, and the like, shall comply with the applicable requirements noted in this standard.

## UL/ULC COMMERCIAL BURGLARY INSTALLATIONS continued...

### User Information:

- The installer should advise the user and note in the User's Manual
- Service organization name and telephone number
- The programmed exit and entry time
- Instructions to test system weekly
- Note that the installer code cannot arm or disarm the system
- The installer should caution the user not to give system information (e.g., codes, bypass methods, etc.) to casual users (e.g., service people) and to only give out codes set to expire within 24 hours
- Identification of the conditions that might be expected to result in false alarms or impaired operation of the product(s): arming the system and not respecting the exit delay, entering the protected premises and not respecting the entry delay for disarming the system can cause false alarms.

## FCC & ISED CANADA COMPLIANCE STATEMENT

This Class [B] digital apparatus meets all requirements of the Canadian Interference–Causing Equipment Regulations.  
Cet appareil numérique de la classe [B] respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

**IMPORTANT!** Changes or modifications not expressly approved by Qolsys Inc. could void the user's authority to operate the equipment.

**CAUTION!** This equipment complies with radiation exposure limits set forth for uncontrolled environment. The antenna(s) used for these transmitters must be installed to provide a separation distance of at least 27 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## FCC & ISED CANADA COMPLIANCE STATEMENT continued...

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## FCC & ISED CANADA COMPLIANCE STATEMENT continued...

### Déclaration d'exposition aux radiations:

Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 27 cm de distance entre la source de rayonnement et votre corps.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

1. l'appareil ne doit pas produire de brouillage, et
2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
3. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Cet appareil est conforme à la norme RSS-247 d'Industrie Canada. L'opération est soumise à la condition que cet appareil ne provoque aucune interférence nuisible.

Cet appareil et son antenne ne doivent pas être situés ou fonctionner en conjonction avec une autre antenne ou un autre émetteur, exception faites des radios intégrées qui ont été testées.

## CE COMPLIANCE STATEMENT

### CE DECLARATION OF CONFORMITY

This product is in conformity with the Electromagnetic Compatibility Directive 2014/30/EU, the Low Voltage Directive 2014/35/EU, and the RoHS3 Directive (EU) 2015/863.

The product is labelled with the CE mark as proof of compliance with the above mentioned European Directives. Also, a CE declaration of conformity (DoC) for this product can be found at [www.qolsys.com](http://www.qolsys.com)

Simplified EU Declaration of Conformity Hereby, Qolsys Inc. declares that the radio equipment type is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: [www.qolsys.com](http://www.qolsys.com)

Frequency Bands	Maximum Power	Frequency Bands	Maximum Power
868.0 MHz - 868.6 MHz	15 mW	868.7 MHz - 869.2 MHz	15 mW

UK single point of contact: Tyco Security Products, Unit 1, 3 & 4, Letchworth Industrial Estate, Works Road, Letchworth Garden City, Hertfordshire SG6 1FF

## EN COMPLIANCE STATEMENT

### **EUROPEAN EN50131 COMPLIANCE STATEMENT (Only for those products labeled EN50131 Compliant)**

This product, IQPanel 4, has been certified by Telefication/Kiwa for installations in accordance with EN50131 up to Grade 2, Class I and meets the requirements of Grade 2, Class I equipment per Standards: EN50131-1:2006+A1:2009+ A2:2017+A3:2020, EN50131-3:2009, EN50131-4: 2019, EN50131-10: 2014, EN50131-6:2017 Type A, EN50136-1:2012, EN50136-2:2013 ATS category SP2, SP4, DP1, DP3.

For EN50131 compliant installations, with alarm control panel IQPanel 4, only the intrusion portion of the alarm system may be activated.

For EN50131 compliant installations, the following functions must be disabled:

- Fire Alarm
- CO Alarm
- Auxiliary (Medical) Alarm functions

The PowerG peripheral devices have two-way communication functionality, providing additional benefits as described in the technical brochure. This functionality has not been tested to comply with the respective technical requirements and should therefore be considered outside the scope of the product's certification.

## EN COMPLIANCE STATEMENT continued...

### Enable “EN Grade 2” Setting

By enabling “EN Grade 2” setting, the following parameters will be changed automatically.

- Entry Procedure (EU) - Follows entry procedures and alarm transmission delays specified by EN 50131-1 standards section 8.38
- Enables arming protest feature when trouble conditions are present. The user must override any troubles in order to arm the system.
- Trouble conditions will remain present until a user has acknowledged them.
- Trouble beeps are expanded to include fault indications required by EN 50131-1 section 8.5.2
- Screen will automatically lock 30 seconds after disarming the system.
- EU Event history buffer - Found in the basic settings menus, EU Events will record mandatory history events specified by EN 50131-1 section 8.10
- Enables “EU Event Swinger Shutdown Count” - setting to change the count to 3 events allowed for any individual event during an arming cycle
- “Auto Bypass” setting is not available
- Panel allows 5 incorrect user code attempts and then locks access for 90 seconds

The installer must be responsible for settings the rest of the following parameters in order to be EN 50131-1 compliant:

- Enable “Screen Lock” settings
  - Set “Loss of Supervisory Signals for PowerG non-emergency sensors” to 20 minutes
  - Set “Normal Entry Delay” to maximum 45 seconds
  - Set Trouble Beeps Timeout to 3 minutes
  - Enable “PowerG RF Jam” EN 30/60
  - Set “Dialer Delay” must remain at 30 seconds
  - Disable “LED Indicator”
  - Disable “Fire Panic” and “Auxiliary Panic”
  - Enable 6 digit access codes
  - “Voice Prompt” needs to be disabled for the security sensors for EN compliant installations
- User must enable “Dealer or Installer Access Requires User Permission

## EN COMPLIANCE STATEMENT continued...

Notes for EN50136-1:2012 Compliant Installations:

The IQ Panel 4 has an integral communicator using the Qolsys proprietary serial interface. The communicator circuitry operates in pass-through mode and it does acknowledge the alarm to the compatible controls panel after an acknowledgement has been received from the compatible alarm receiver.

The IQ Panel 4 integral communicators are compatible with the following receivers: Sur-Gard System I-IP Receiver, version 1.41+. Sur-Gard System II Receiver, version 2.14+, Sur-Gard SG-DRL3-IP, version 2.36+ (for Sur-Gard System III Receiver), Sur-Gard SG-DRL4-IP version 1.29+ (for Sur-Gard System IV Receiver), and Sur-Gard SGDRL5-IP version 1.04+ (for Sur-Gard System 5 Receiver).

1. The IQ Panel 4 integral communicator is monitored by the control panel and it is programmed via the programming menu available from the website portal.
2. The HSPA 3G/LTE Cellular path is immune to conducted and radiated RF fields with levels up to 10V/m as tested per EN50130-4 Standard.
3. The IQ Panel 4 integral communicator conforms with radiated emissions levels for Class B equipment as per standards EN61000-6-3/EN55032/CISPR32.
4. The IQ Panel 4 integral communicator has one cellular communication path using 900/1800/2100 MHz Public Cellular Network and one Wi-Fi 2.4/5GHz communication path. It can use one, the cellular path (SP2 or SP4) or both in backup configuration (DP1 or DP4 using cellular as primary path and Wi-Fi as back-up).
5. The IQ Panel 4 integral communicator used AES128 encryption algorithm for communication with compatible receivers. The AES 128 encryption of data communication ensures substitution and information security.
6. The IQ Panel 4 integral communicator has been tested for compliance in conjunctions with the following applicable standards: EN50136-1:2012+A2:2018, EN50136-2:2013, EN50131-10:2014, ATS configuration: SP2, SP4 and DP1, DP3.

For EN50131-1:2006/A1:2009/A2:2017/A3:2020 compliant installations, the following programming options shall be set as described: Test transmission interval set to 24h for SP2 and DP1 configuration. Supervision shall be set to 180s for SP4 and DP3 configurations. IQ Panel 4 integral communicator has been certified by Telefication in accordance with EN50131-1:2006/A1:2009/A2:2017/A3:2020, EN50131-10:2014 requirements for Grade 2, Class I and EN50136-2:2013 Configuration: SP2, SP4, DP1 and DP3.

## UK COMPLIANCE STATEMENT

### PD6662 COMPLIANCE STATEMENT (Only for those products used in UK installations)

The IQPanel 4 is suitable for use in systems installed to conform to PD6662:2017 (with notification options: A, B, C, D, or F) at Security Grade 2 and environmental Class I. BS8243:2010 + A1:2014, where Option:

- A. denotes use of 2 remotely powered sirens and single path rated SP2 communicator
- B. denotes use of a self powered siren (ex. PG8901/PG8911) and a single path rated SP2 (24h supervision, use Cell only) communicator
- C. denotes use of a dual path rated DP1 (24h supervision, use Cell and Wi-Fi) communicator, use of sirens is optional
- D. denotes use of single path rated SP4 (180s supervision, use Cell only) communicator, use of sirens is optional
- F. denotes use of a dual path rated DP3 (180s supervision, use Cell and Wi-Fi) communicator, use of sirens is optional

## ADDITIONAL LEGAL INSTRUCTIONS

### Recycling and Disposal:

Dispose in accordance with applicable legislation. This product must be disposed of separately from general household waste. Take it to a designated waste collection point in your area for safe disposal or recycling in accordance with National (i.e. US, Canada, European, Mexico, etc), Regional, State and Local Regulations and Laws. By doing this, conservation of natural resources, protection of the environment and human health occurs.

# SPECIFICATIONS

# SPECIFICATIONS - NORTH AMERICA

Items	Parameters	IQ Panel 4
Platform	Android OS	Android 9
LCD Display	Size	7" (17.8CM) LCD
	Resolution	1280 x 800 pixels
	Brightness	300 cd/m <sup>2</sup>
	RGB Color	24bit, 16.9 million colors
Processor	8 Core	Qualcomm Snapdragon 8 Core SOM (System On a Module) with 16 GB of NAND Flash
Touchscreen	Type	Capacitive glass multi-touch
User Codes	Up to 242	Role based (Dealer, Installer, Master, User, Guest, Duress)
Network	WiFi	Wi-Fi 802.11 a/b/g/n/ac dual band 2.4/5ghz - including built-in router capability
	Cellular	LTE CAT4 (Bands 2/25, 4/66, 5/26, 7, 12/17, 13, 14 (non-First Net))
Z-Wave Plus 700	Up to 167 Devices	167 total devices (80 lights, 20 Locks, 40 Thermostats, 21 Misc, 6 Garage Doors)
PowerG	Up to 128 devices	915 MHz, long range, secure encrypted two-way wireless
Security RF		Depending on the model; either S-Line encrypted 319.5MHz, 345MHz or 433MHz
Bluetooth	Disarming, Audio Streaming	Qualcomm Bluetooth Low Energy (BLE) 4.2
Flash Memory	Internal Storage	16GB NAND Flash

# SPECIFICATIONS - NORTH AMERICA

Items	Parameters	IQ Panel 4
LED Indicator	Status LED	Green (Disarmed), Red (Armed), Triple full color RGB LED
Speakers/Siren	4w x 4	QuadSound 4x Front Facing 4watt speakers and 85dB siren
Camera	Front Camera	8MP wide angle 120° field of view, fixed focus camera with FlexTilt adjustment
Microphone	MEMs x 3	3 MEMs (micro electro mechanical system) Microphones with echo cancellation
Tamper	Tamper Switch	Dual Panel and wall tamper switch with spring release
Battery	Type 18650	Lithium Ion 3000mAh. Ningbo Veken Battery Co., Ltd, Model VT27 or Icon Energy System Co. Ltd, Model IANO34NA
Buttons	Hard Button	Single wake/sleep button used for sleep/wake, hard reboot, and clean screen cancel
Mechanical	Dimension	6.1"H x 7.5"W x 1"D (155mm x 191mm x 26mm)
Power Supply	AC/DC External Plug-in Adapter	Output: 7vDC (=) 1000mA CC, or 7vDC(=) 1.5A CC, Input 100-240VAC 50/60Hz. Adapter evaluated at 120vAC for UL/cUL
Mount	Back Plate	SmartMount wall mount included. SmartMount table stand or SmartMount IQ Base table stand with built-in subwoofer sold separately.
Certification	UL/ULC	UL/ULC Residential Fire and Burglary and UL/ULC Commercial Burglary Alarm Control Unit. Compliant with standards: UL985, UL1023, UL2610, ULC-S545, ULC-S304
	FCC	2AAJXQS-IQP4 (may contain additional modules with separate FCC ID's)
	IC	11205A-QSIQP4 (may contain additional modules with separate IC ID's)
	NOM, IFETEL	Certificado No.: Reserved
Temperature	Operational	0 to 49C, up to 93% relative humidity, indoor, dry ordinary locations use only
	Storage	-20 to 50C

# SUPPORTED 319 MHz S-LINE SENSORS

Detector Type	Model
IQ Door/Window-S	QS1133-840 <sup>UL</sup> , (UL Listed M/N: 60-362N-10-319.5), QS1135-840, QS1136-840, QS1137-840
