

Elite Series IP Front Door Intercom Station

SI-8000 Series

Channel Vision's Elite Series IP Front Door Intercom Station provides access control and video communication to the front door using SIP protocol. The door station (SI-8000) is equipped with a built-in IP camera that allows residents to video chat with visitors. The SI-8000 door station can be controlled remotely using the Linphone app, available to download for free for Apple™ and Android™ devices. The SI-8000 door stations are available in oil rubbed bronze, textured black, satin nickel and white finishes.

FEATURES
