

CLEERLINE OUTDOOR TERMINAL BOXES

Sold Empty, Up to 12 ports

Cleerline Outdoor Terminal Boxes provide secure protection for terminations in OSP environments. Each terminal box is designed to maximize efficiency, allowing easy access to feedthrough adapters while using the least amount of space possible.

All outdoor terminal boxes provide ample cable management, including winding areas and pass throughs. Hinged internal distribution panels allow two levels of cable management.

Cleerline Outdoor Terminal Boxes are available in sizes to accommodate 2, 4, or 12 adapters or feedthroughs.

FEATURES AND BENEFITS

- Durable plastic construction
- Included winding area
- Compatible with standard adapters for fiber optic connectors
- Secure closure
- Optimized cable management
- PC + ABS material, waterproof, dust-proof, protection up to IP65

ENVIRONMENTAL REQUIREMENTS

Working Temperature	-40°C - +85°C
Relative Humidity	< 85% (+30°C)
Atmospheric Pressure	70 kPa - 106 kPa
