Tools/Hardware needed:

Screw Driver
and/or Drill

You may also need:

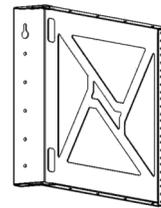

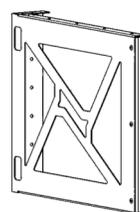

Mounting screws
and anchors

Mounting hardware is **NOT** included

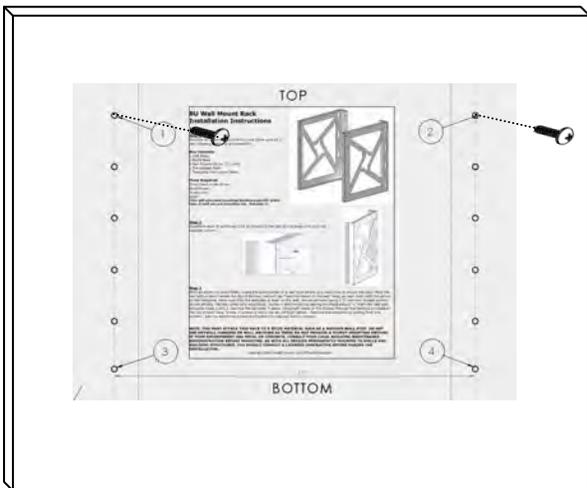

What's in the box?

Qty 1: Wall Mount Rack

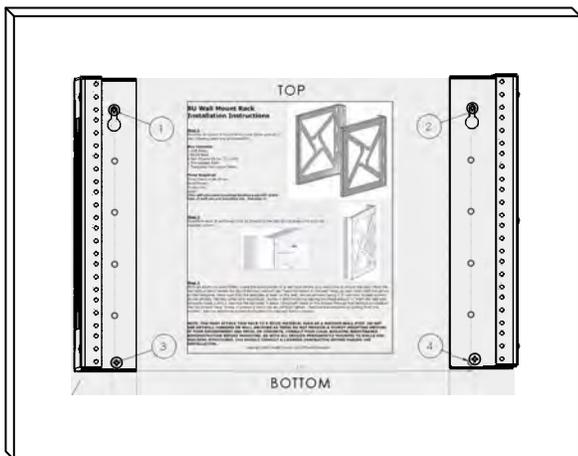

Qty 1: Wall Mount Template

Step 1:

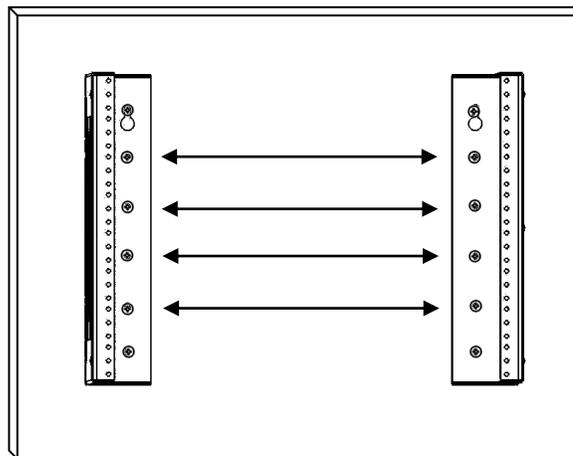

1. With a electronic stud finder, locate the exact center of a wall stud where you would like to mount the rack. Mark the wall with a pencil where the top of the wall rack will be.
2. Tape the stencil to the wall lining up your mark with the arrow on the template. Make sure the template is level on the wall.
3. We recommend using 2.5" common drywall screws driven directly into the center of a wood stud. Screw in the first screw leaving the head around 1/2 from the wall into template holes 1 and 2.

Step 2:

1. Leaving the template in place, hang both sides on the screws through the keyhole provided at the top of each base.
2. Screw in screws 3 and 4 but do not fully tighten. Remove the template by pulling from the bottom.

Step 3:

1. Add the additional screws and tighten the top and bottom screws.
