# EXARC Quick Start Guide

- The EXARC is a 40m HDMI 2.0b (18Gbp)/ 70m 1080p HDR Extender that supports ARC and return audio via optical S/PDIF.
- ARC is output via HDMI port or optical S/PDIF port on the TX unit
- IR and RS232 commands are sent to and from both the TX and the RX allowing IR and RS232 to be sent from source end to display and/or from display end to source end
