

4K or 1080p Display

4K or 1080p Source

- The SCALE1 is a HDMI 2.0b (18Gbps) 4K scaling device that will automatically scale form 4K to 1080p and 1080p to 4K
- The SCALE1 is automatic, but can be overridden with the "Scaling" button
- The SCALE1 is compact and can be placed behind the display
- Great for systems where scaling is needed for legacy displays
