

Summary

The DW-DTPIRIPW is a quad-element passive infra-red (PIR) external movement detector that combines advanced signal processing and unique optical systems. The detector's quad PIR sensing module is equipped with two (2) volt-free and two (2) negative-switched outputs with a programmable beam range of up to 98.5ft (30m), avoiding boundary overspill and offering truly exceptional resistance to false alarms. Using PoE and IP communication, the DW-DTPIRIPW supports direct integration with DW Spectrum® IPVMS, all major VMS and camera systems on the market.
