

eARCEX

eARC Audio Extender with CEC

The eARCEX is an audio only extender designed to take the eARC audio of a display to an amplifier or other eARC/ARC enabled device and transmit it in full bandwidth up to 100m (330ft) over category cable. CEC transmission is supported so the display's remote can be used to control the volume of the amplifier/AVR. The eARCEX also supports optical S/PDIF transmission up to 100m. The eARCEX is designed to be a simple plug and play device to get eARC/ARC from the display back to the eARC/ARC enabled amplifier or other eARC/ARC device that is too far away to use a traditional HDMI cable.

Features:

- Supports all eARC audio formats
- Backwards compatible with ARC
- CEC source control
- Supports full uncompressed audio resolution
- Powers via single supply (either end)
- 3-Year Warranty
