MONITOR MODULES

SK-MON-10 Intelligent Ten-Input Monitor Module

Intelligent 10-input monitor modules are designed for use with Honeywell Silent Knight® Series fire alarm control panels. Each monitor module is intended to interface between a control panel and a normally open contact device.

Overview

Intelligent 10-input monitor modules are designed for use with Honeywell Silent Knight® Series fire alarm control panels. Intelligent 10-input monitor modules are intended to interface between control panels and a normally open (NO) contact devices. A common SLC input is used for all modules and the initiating device loops share a common supervisory supply and ground. Otherwise, each monitor operates independently from the others, and each module has its own address. Conventional 4-wire smoke detectors can be monitored by the intelligent 10-input monitor modules for alarm-worthy conditions.

Features & Benefits:

- Rotary address switches allow for fast installation
- Support for Class B and Class A wiring
- LED indicators for each input
- Disables unused addresses

Certifications:

- UL Listed
