

IQ4 No Entry Delay Arming

Purpose:

Provide a quick way of arming the panel in the Stay mode with no entry delay on the entry zones.

Process:

Create a Scene for the panel via the client's Alarm.com account.

Step 1: Select 'Automation'

Step 2: Select 'Scenes'

Step 3: Select 'New Scene'

Step 4: Create a new Scene:

IQ4 No Entry Delay Arming

< Sce	enes		Edit Scene		Ċ
Show or	No Entry)			
•	SYSTEM Disarm	Arm (Stay)	Arm (Away)		
Warning	No Entry Delay	Silent Arming	e, editing the scene will cau	se the rule to be disabled.	
				CANCEL	SAVE

- 1) Select the desired icon by clicking on the icon circle next to the 'Scene Name'
- 2) Name the scene
- 3) Select "Show on Panel 🗸 "
- Select "⊕ SYSTEM"
- 5) Create the Arming mode:
 - a) Select the arming mode that is desired
 - b) Select 🗹 No Entry Delay, and 🗹 Silent Arming if desired
 - c) Click 'SAVE'

Preprogrammed scenes:

The "Away", "Home", "Sleep" and "Wake Up" scenes are Alarm.com defaults – they can be removed from the panel view by editing the induvial scenes as needed. However, they cannot be removed from the Alarm.com app. The scenes can be edited, but Alarm.com will not allow them to rename.
